#### QUESTION 1

When the EMC NetWorker Module for SAP on Oracle is used, which interface can be used to perform recoveries?

- A. SAP BR\*Tools
- B. backint only
- C. RMAN only
- D. Both backint and RMAN

Correct Answer: A

---

#### QUESTION 2

What is an advantage of using backup from within the cloud with Dell EMC NetWorker and a CloudBoost appliance?

- A. Support for Client Direct with Windows clients
- B. Fast restore form local cache copies using site cache
- C. Backup data deduplication at the source
- D. Cloud-protected storage for long-term backups only

Correct Answer: B

CloudBoost supports multiple cache sizes as explained earlier. A local cache within the appliance can improve backup performance in cases where the appliance has low bandwidth to the target object store.

---

#### QUESTION 3

What is a characteristic of how the EMC NetWorker modules integrate with native applications?

- A. EMC NetWorker module acts as an intermediate layer between EMC NetWorker and the native application.
- B. The application vendor provides EMC NetWorker module to allow data protection with EMC NetWorker.
- C. EMC NetWorker module runs on EMC NetWorker server and acts as an intermediate layer for backup data from EMC NetWorker client.
- D. EMC NetWorker module runs on EMC NetWorker storage node and acts as an intermediate layer for backup data from EMC NetWorker client.

Correct Answer: A

---

#### QUESTION 4

An EMC NetWorker backup administrator manages a complex backup environment with a NetWorker server, remote storage nodes, over 1,000 clients and five Data Domain devices. They want to simplify backup management and monitoring for this environment.

What is recommended?

- A. Assign clients and devices to restricted data zones
- B. Separate clients and other resources into domains by department
- C. Use Client Manager to manage and monitor clients and backups
- D. Use multi-tiers on the Data Domain systems for backups

Correct Answer: A

---

#### QUESTION 5

Which EMC NetWorker process keeps the record of the TCP/IP port range that is used by EMC NetWorker processes?

- A. nsrexecd
- B. nsrports
- C. nsrd
- D. nsrpm

Correct Answer: A
