QUESTION 1

Due to a scheduling conflict, an EMC Avamar administrator had to cancel the backup of a client using the Avamar Administration GUI. What happens to the backup data that had already been sent to the Avamar server?

- A. Data is retained for seven days as a partial backup
- B. Chunks from the incomplete backup will be removed at the next garbage collection
- C. Data is retained for the remainder of the retention policy that was used for the backup
- D. Data is tagged "corrupted" and will be marked recoverable at the next HFS check

Correct Answer: A

QUESTION 2

By default, what does the Avamar Email Home profile send?

- A. Status of the daily integrity check
- B. Avamar alerts once daily
- C. Reports once daily
- D. Avamar alerts as they occur

Correct Answer: D

Email Home An optional feature that uses the High Priority Events profile and Notification schedule to regularly send server error and status messages to EMC Technical Support.

Facilitating support

EMC recommends that you enable ConnectEMC and Email Home on all Avamar systems:

- ◆ ConnectEMC automatically generates service requests for high priority events.
 - ◆ Email Home emails configuration, capacity, and general system information to EMC Customer Support.
-

QUESTION 3

Which factor(s) affect the capacity utilization in an EMC Avamar environment?

- A. Total amount of primary data being backed up
- B. How often the backups are scheduled to run
- C. Size of the grid and license amount
- D. Whether HFS check succeeds every day

Correct Answer: A

QUESTION 4

You are working in a Microsoft Windows Active/Passive cluster environment. On which cluster node(s) must the EMC Avamar Windows file system client be installed?

- A. Active and passive clients only
- B. Active client only
- C. Virtual client only
- D. Active, passive, and virtual clients

Correct Answer: A

QUESTION 5

What is the first process performed by avatar when running an EMC Avamar backup?

- A. Traverses each directory in the backup dataset
- B. Checks the client's file cache
- C. Runs sticky-byte factoring
- D. Writes to the hash cache file

Correct Answer: A
