QUESTION 1

You are working on a system with a faulted SPE power supply, and an alert is present in Unisphere. When can the related alert be deleted?

- A. After the issue has been resolved.
- B. Alerts cannot be deleted.
- C. The alert will delete automatically.
- D. After a storage processor reboot.

Correct Answer: A

QUESTION 2

Which type of connection is needed to add a secondary Control Station when using a laptop?

- A. Serial
- B. Network
- C. IEEE 1394
- D. SAS

Correct Answer: D

QUESTION 3

You are working on a VNX Unified system that has a fault LED illuminated on the DME. What action would you take to further analyze the system status?

- A. Launch USM and capture diagnostic data from the system.
- B. Install VNX Analyzer to capture the DME hardware status.
- C. Perform a background verify operation on the control LUNs.
- D. Trespass the control LUNs to the peer storage processor.

Correct Answer: A

QUESTION 4

Refer to the exhibit.

If the VNX PG does not show an option for the activity you wish to do, then the procedure can be found in User Personalized Documentation (UPD).

1. [] Generate the procedure for your activity using UPD.
2. [] Read the VNX Service Activity Guide (VSAG) to check for supplemental information for this activity.

When using the VNX Procedure Generator to make a hardware replacement procedure, what will be the results of selecting the indicated link?

- A. A series of windows with drop-down lists is presented for the user to select the VNX model, storage type, and part to be replaced.
- B. A parts replacement PDF file is generated and emailed to the user who is running the VNX Procedure Generator.
- C. Unisphere Service Manager is launched with user-selectable drop-down lists for selecting part replacement activity.
- D. Unisphere Service Manager is launched to gather system information for producing a part replacement procedure.

Correct Answer: A

QUESTION 5

How is a storage subsystem connected to a VNX Gateway in a direct-attached environment?

- A. Fibre Channel
- B. Ethernet public LAN
- C. Serial
- D. Ethernet private LAN

Correct Answer: A
