QUESTION 1

A SAN administrator creates a SAN Copy session between two EMC VNX using Navisphere Secure CLI for a single database LUN. The session starts copying but fails to complete. What is the most likely cause of this failure?

- A. The destination LUN is smaller than the source LUN.
- B. A host has mounted the LUN on the destination VNX.
- C. LUN masking has not been completed.
- D. Zoning between the two VNX is incorrect.

Correct Answer: A

QUESTION 2

A customer plans to use Incremental SAN Copy (ISC) to migrate data between two EMC VNX. They attempt to create a SAN Copy session from a source LUN, but are unable to create the session. Which is the most likely cause for this SAN Copy session behavior?

- A. The source LUN is a SnapView snapshot LUN.
- B. The source LUN is already being replicated to a destination LUN.
- C. The source and destination LUNs are not the same RAID type.
- D. The SAN Copy session is not running on a MirrorView port.

Correct Answer: A

QUESTION 3

Exchange 2010 is installed on a virtual machine using VMDK files. Replication Manager is being used to take snapshots of the virtual machine files and back them up to disk. After a few weeks, the Exchange server backups stop functioning. What is the most likely reason for this failure?

- A. Replication Manager agent service has stopped
- B. Replication Manager can only snapshot powered off VMs
- C. Replication Manager is not compatible with VMFS version 5
- D. Replication Manager agent is installed on each DAG server

Correct Answer: A

QUESTION 4

A customer deployed a single EMC RecoverPoint 2-node cluster with Virtual RPA configured with RecoverPoint/SE license at the primary site. They want to scale-up the environment.

With the current RecoverPoint/SE license, how many vRPAs can be added?

- A. 0
- B. 4
- C. 6
- D. 8

Correct Answer: C

QUESTION 5

Which RecoverPoint/SE volume type stores information about the cluster and must be accessible by all RPAs?

- A. Repository
- B. Copy journal
- C. Production journal
- D. All volumes in the replication set

Correct Answer: A
