QUESTION 1

A coded value domain provides which two benefits for attribute editing? (Choose two)

- A. It specifies valid values for an attribute
- B. It stores rules for attribute display
- C. It displays a user-friendly description
- D. It validates all attributes in a given table

Correct Answer: A

QUESTION 2

An ArcGIS user's plotter will only print up to 42 inches. However, the user is trying to print a large plot (84 inches x 60 inches) for a wall map.

What must the ArcGIS user do to print the wall map?

- A. divide the map data frames and tile them to measure 84x60
- B. modify the printer settings to apply a tile to match the 84x60 output size
- C. in Layout view stretch the data frame to the 84x60 output size
- D. set up Data Driven Pages to match the page layout size of 84x60

Correct Answer: A

QUESTION 3

An ArcGIS user is creating a road polygon feature at a specified distance on each side of a road centerline.

100% Real QandAs | 100% Real Pass

Which geoprocessing tool should be used to accomplish this?

- A. Intersect
- B. Buffer
- C. Feature to Polygon
- D. Clip

Correct Answer: B

QUESTION 4

An ArcGIS user wants to create a stand-alone table in a geodatabase that will contain additional information about land parcels. The parcels reside in an existing feature dataset.

Where will this table reside in the geodatabase?

- A. within the same feature dataset as the parcel feature class
- B. within the geodatabase at the root level
- C. within a newly created feature dataset
- D. within a new network dataset

Correct Answer: A

QUESTION 5

An ArcGIS user has a single long line that is intersected by many other lines. The user wants to split the long line at each intersection.

Which tool allows the user to perform this in a single step?

- A. Split
- B. Planarize Lines
- C. Line Intersection
- D. Trim

Correct Answer: C
