QUESTION 1

What is the purpose of the /i command line switch for LDISCN32.EXE?

- A. tells the scanner to create a log file
- B. specifies the name of the output file
- C. specifies the name of the Inventory Server
- D. specifies the location to check for an updated LDAPPL3.LDZ file

Correct Answer: D

QUESTION 2

You have targeted a subnet of lab computers that all need to be reimaged. You create a Migration task that will reimage the machines using Targeted Multicast™ and start the task. The job fails, stating that a Multicast Domain Representative could not be found.

What is the most likely cause of the error?

- A. There is not a PXE Proxy on the targeted subnet.
- B. A preferred Multicast Domain Representative has not been selected for the targeted subnet.
- C. There is not a managed node with the Targeted Multicast client that will persist on the subnet.
- D. The routers between the Core Server and the targeted subnet have not been configured to pass multicast packets.

Correct Answer: C

QUESTION 3

You have purchased 100 new computers from a vendor who will deliver 20 computers each week for the next five weeks. You have a comma-separated file containing pertinent information about each of the 100 machines. You want to create a task that will automatically install a new operating system on these computers as they are delivered. How can this be accomplished using the least amount of administrative effort?

- A. boot each machine into PXE Mode and select the proper task from the DOS Boot Menu
- B. install the LANDesk® client on each machine as it arrives; create a task to install the new operating system; as the last machine arrives, schedule the task to update the operating system
- C. use SCANGEN.EXE to create database records of each computer; create a migration task to install the required operating system; schedule and start the task; initiate a PXE boot on each machine as it is delivered
- D. use CSVIMPORT.EXE to create database records of each computer; create a migration task to install the required operating system; schedule and start the task; initiate a PXE boot on each machine as it is delivered

Correct Answer: D

QUESTION 4

To initiate a Remote Control session with a Windows XP client using Windows NT security, you must be a member of which group?

- A. Remote Control Users
- B. Remote Control Operators
- C. Remote Console Operators
- D. Remote Control Administrators

Correct Answer: B

QUESTION 5

Which hotkey combination locks out the keyboard and mouse on the remote system?

- A. Ctrl-Alt-D
- B. Ctrl-Alt-L
- C. Ctrl-Alt-K
- D. Ctrl-Alt-M

Correct Answer: C
