QUESTION 1

You have targeted a subnet of lab computers that all need to be reimaged. You create a Migration task that will reimage the machines using Targeted Multicast™ and start the task. The job fails, stating that a Multicast Domain Representative could not be found.

What is the most likely cause of the error?

- A. There is not a PXE Proxy on the targeted subnet.
- B. A preferred Multicast Domain Representative has not been selected for the targeted subnet.
- C. There is not a managed node with the Targeted Multicast client that will persist on the subnet.
- D. The routers between the Core Server and the targeted subnet have not been configured to pass multicast packets.

Correct Answer: C

QUESTION 2

You are performing a new installation of LANDesk® Management Suite in your network. There are several clients that are in workgroups outside of the Windows domain.

What must be done on the Core Server to enable a push-based configuration to all Windows NT/2000/XP clients?

- A. modify the Intel Scheduler service to log on as LocalSystem and add the workgroup names to the additional credentials section
- B. modify the Intel Local Scheduler service to log on as LocalSystem and add the workgroup names to the additional credentials section
- C. modify the Intel Scheduler service to logon as a domain administrator and add valid local administrator logins to the additional credentials section
- D. modify the Intel Local Scheduler Service to log on as a domain administrator and add valid local administrator logins to the additional credentials section

Correct Answer: C

QUESTION 3

You have just created a new task using the Manage Scripts tool that incorporates the SYSPREP process. By default, where is the newly created .INF file stored on the Core Server?

- A. C:\Program Files\Intel\DTM\scripts

- B. C:\Program Files\LANDesk\OSDScripts
- C. C:\Program Files\LANDesk\Management Suite\landesk\files
- D. C:\Program Files\Intel\DTMManagement Suite\LDLogon\PMScripts

Correct Answer: C

QUESTION 4

To which default group do you add a user to provide the user with access to a LANDesk?published report?

- A. LD_Reports
- B. Report_User
- C. Dashboard_User
- D. LANDesk Reports
- E. LANDesk Management Suite

Correct Answer: D

QUESTION 5

In Software License Monitoring, why would you downgrade a product license?

- A. to normalize vendor data
- B. to enable circular borrowing
- C. to prevent the older version from exceeding its license count
- D. to allow a newer version to borrow a license from an older version

Correct Answer: C
