#### QUESTION 1

To return from a Data Abort handler and re-execute the aborting instruction, what value should be loaded to the PC?

- A. PC=LR
- B. PC=LR44
- C. PC=LR-4
- D. PC=LR-8

Correct Answer: D

---

#### QUESTION 2

An advantage of removable flash memory over built-in flash memory is that:

- A. Storage can be easily replaced, for example to increase capacity.
- B. It is quicker to access, providing far greater bandwidth for read operations.
- C. It has a longer life, indicated by being rated for a higher number of write cycles.
- D. It takes up less physical space in a device, and does not require any space on the printed circuit board.

Correct Answer: A

---

#### QUESTION 3

Under which of the following circumstances is TLB maintenance always required?

- A. If a TLB miss occurs
- B. On every process switch
- C. If the TLB reports a fault
- D. When a page table entry is changed

Correct Answer: D

---

#### QUESTION 4

Which TWO of the following options are DISADVANTAGES of building source code to use software floating point?  
(Choose two)

- A. Not all floating point arithmetic operations are supported

- B. Floating point calculations have lower performance than hardware floating point
- C. The stack cannot be used to pass floating point function arguments
- D. The results of floating point calculations will be less accurate
- E. The resulting code will be larger

Correct Answer: BE

---

#### QUESTION 5

The ARMv7-A virtual memory management system supports 32-bit (short) and 64-bit (long) page table descriptors. The sizes of a small page in a short descriptor and a small page in a long descriptor are:

- A. 1 KB and 4KB respectively
- B. 4KB and 4KB respectively
- C. 4KB and 16KB respectively
- D. 16KB and 16KB respectively

Correct Answer: B
