### QUESTION 1

Which port does the Relay Server use to communicate with the RES Workspace Manager Agents?

- A. Port 3163
- B. Port 1942
- C. Port 10000
- D. Port 3389

Correct Answer: B

---

### QUESTION 2

An administrator has configured User Settings for a specific application to track registry and files. At application level, the User Setting is enabled. Start tracking changes is configured to track changes immediately.

However, no changes are being preserved for users of the application. Which of the following could be the cause of this problem?

1.  
Sampling mode is disabled.
2.  
User Settings is disabled at global level.
3.  
"Preserve" and "Apply" are both checked.
4.  
"Allow users to restore their own settings" is disabled.

- A. 1 and 2 only
- B. 3 only
- C. 2 only
- D. 4 only

Correct Answer: C

---

### QUESTION 3

The SQL Server logging shows that new connections are refused on a regular basis because the SQL Server has

reached the maximum amount of concurrent connections. As a result configuration changes are not replicated to all of the Agents in time because they cannot connect to the database. What needs to be done to prevent this from happening and make your infrastructure more scalable for the future while still maintaining a single point of configuration for the RES Workspace Manager environment?

- A. Deploy Relay Servers and configure the Agents to connect to the database indirectly (through those Relay Servers)
- B. Split the Datastore and have logging and tracking saved to a secondary database
- C. Create a new database and let half of the total number of Agents connect to the new database
- D. Migrate the database to a database server hosted on two or more clustered machines

Correct Answer: A

---

#### QUESTION 4

What are valid RES Workspace Manager Identity options?

- A. All Users, Organizational Unit Location
- B. Not in Group, Administrative Role, Location
- C. Application Manager, Not Administrative Role, Domain
- D. Application Manager, Not in Group, Language

Correct Answer: B

---

#### QUESTION 5

What RES Workspace Manager feature must an administrator use to monitor if users save files to the local hard drive of their computers?

- A. Read-Only Blanketing in Enabled mode
- B. Read-Only Blanketing in Learning mode
- C. Files and Folder Security in Enabled mode
- D. Files and Folder Security in Learning mode

Correct Answer: B
