Following Questions and Answers are all new published by RES Software Official Exam Center

QUESTION 1

What can be used to generate files for the Workspace Designer?

1.

 User Settings Sampling Mode

2.

 Desktop Sampler

3.

 Baseline Desktop Analyzer

4.

 Instant Reports

A. 1 and 2

B. 2 and 3

C. 1 and 4

D. 3 and 4

Correct Answer: B

QUESTION 2

The SQL Server logging shows that new connections are refused on a regular basis because the SQL Server has reached the maximum amount of concurrent connections. As a result configuration changes are not replicated to all of the Agents in time because they cannot connect to the database. What needs to be done to prevent this from happening and make your infrastructure more scalable for the future while still maintaining a single point of configuration for the RES Workspace Manager environment?

A. Deploy Relay Servers and configure the Agents to connect to the database indirectly (through those Relay Servers)

B. Split the Datastore and have logging and tracking saved to a secondary database

C. Create a new database and let half of the total number of Agents connect to the new database

D. Migrate the database to a database server hosted on two or more clustered machines

Correct Answer: A

QUESTION 3

Which log shows if the environment is sized correctly to handle session starts without exceeding the configured

maximum number of simultaneous logons?

A. CPU Optimization Log

B. Access Balancing Log

C. Session Log

D. Global Error log

Correct Answer: B

QUESTION 4

What is a Workspace Extension?

A. A workstation-installed application that is integrated in a laptop environment.

B. A Terminal Server-installed application that is published through RES VDX.

C. A workstation-installed application that is integrated in a Terminal Server environment.

D. A Terminal Server-installed application that is published through the RES Workspace Extender.

Correct Answer: C

QUESTION 5

Memory Optimization optimizes the

A. Virtual memory usage of system processes.

B. Physical memory usage of system processes.
