### QUESTION 1

When using Data Sources with a virtual application (e.g. Microsoft App-V or ThinApp), they will be created

- A. On the virtual application server.
- B. On the user's home drive.
- C. In the virtual environment.
- D. In the Datastore.

Correct Answer: C

---

### QUESTION 2

RES Workspace Manager is configured to monitor CPU usage to prevent bad applications from disturbing other sessions. What happens when an application takes too much processing time?

RES Workspace Manager will:

- A. Lower the process priority so the operating system will only run it in leftover CPU time.
- B. Kill the application after notifying the user about the misbehaving process.
- C. Automatically move the running instance to a free server, if available.
- D. Pause the application, notify the user, and continue the application when there's enough free CPU power.

Correct Answer: A

---

### QUESTION 3
