### QUESTION 1

Which statement is true about script parameters in FileMaker Pro 11?

- A. Script parameters can include any number of repetitions.
- B. A subscript inherits the script parameter of the script that called it.
- C. Scripts set to run OnFirstWindowOpen cannot include script parameters.
- D. When choosing scripts from the Scripts menu, script parameters can be added by holding down the Option (Mac OS X) or Alt (Windows) key.
- E. Get( ScriptParameter ) results in a returndelimited list of script parameters for all currently running scripts in a window's script stack.

Correct Answer: C

---

### QUESTION 2

What is the maximum number of recursive calls that can be made utilizing a custom function in FileMaker Pro 11 Advanced?

- A. 10,000
- B. 32,000
- C. 50,000
- D. 64,000

Correct Answer: C

---

### QUESTION 3

Given a FileMaker Pro 11 database containing the following two scripts:

Script A:

Set Variable [ \$beeps Value:2 ]

Beep

Perform Script [ "Script B" Parameter: \$beeps ]

Beep

Script B:

Set Variable [ \$counter Value:0 ]

Loop

Beep

Set Variable [ \$counter Value:\$counter + 1 ]

Exit Loop If [ \$counter > Get( ScriptParameter ) ]

End Loop

Exit Script []

Beep

When Script A executes, how many beeps will be heard?

A. 3

B. 4

C. 5

D. 6

Correct Answer: C

---

#### QUESTION 4

Given a FileMaker Pro 11 database with the following script:

Perform Find [Restore]

# Find restores criteria: Customer::Name [Smith]

Refresh Window

If [Get ( LastError )]

Show Custom Dialog ["No records found" "No records matched your find criteria."]

End If

Which two statements are true if there are no records where the Customer::Name field contains "Smith"? (Choose two.)

- A. Unless a Set Error Capture [On] step is added at the beginning of the script, Get (LastError) will not return an error value.
- B. Adding a Set Error Capture [On] step to the beginning of the script has no effect on whether or not the custom dialog displays its error message.
- C. Adding a Set Error Capture [On] step to the beginning of the script will cause a default FileMaker error dialog to display, followed by the custom error dialog.
- D. Adding a Set Error Capture [On] step to the beginning of the script will suppress the default FileMaker error stating that no records match this set of find requests.

Correct Answer: BD

---

#### QUESTION 5

Given Table A in File A, which condition allows access to Table A while using another file called File B?

- A. File B must be opened and cascade its account credentials to File A.
- B. File A and File B must have an account with the same name and password.
- C. The privilege set associated with the account that is logged into File A must allow access to the records in Table A.
- D. The privilege set associated with the account that is logged into File B must allow access to the records in Table A.

Correct Answer: C
