QUESTION 1

A table in a FileMaker Pro 11 database has a field CompanyName of type Text. The following field

validation options are set for this field:

Validate data in this field only during data entry

Allow user to override during data entry

Require not empty

Display custom message if validation fails

A user imports a set of records into this table. Some records have no value in the CompanyName field.

What will occur?

- A. All of the records will be imported. No error message will be displayed.
- B. The user will see the custom error message, but the import will continue if the user overrides the error.
- C. All records with a value for CompanyName will be imported. The user will also see the specified custom error message.
- D. The user will see the custom error message, but in the case of an import, overriding the error is not allowed and no records are imported.
- E. All records with a value for CompanyName will be imported. The user will see an error dialog from the FileMaker Pro application stating that some records could not be imported due to errors, along with a count of those records.

Correct Answer: A

QUESTION 2

For which two actions will FileMaker Pro 11 NOT preserve Sort Order for records being browsed, by reordering or resorting the found set following the action? (Choose two.)

- A. selecting the Records > Show Omitted Only menu item
- B. adding records to the table using File > Import Records > File...
- C. modifications to a field's data caused by choosing Relookup Field Contents for a field used to specify the current sort order
- D. modifications to schema for instance redefining a field type from Number to Text when that field is used to specify the current sort order
- E. in Browse mode, rightclick a field that is used as a field used to specify the current sort order and choose the Extend Found Set popup menu item to add some matching records to the found set

Correct Answer: AB

QUESTION 3

Which two statements are true concerning Administrator Groups in FileMaker Server 11? (Choose two.)

- A. Administrator Groups may be nested.
- B. The Administrator Groups feature is only available in FileMaker Server 11 Advanced.
- C. A group administrator can disconnect clients from databases in their Administrator Group.
- D. A group administrator can limit the numbers of clients that can access hosted files within their Administrator Group.
- E. A group administrator can change the FileMaker security settings for all databases in their Administrator Group.

Correct Answer: BC

QUESTION 4

While in a FileMaker Pro 11 database on a layout based on the Invoice table occurrence, the following script is run:
Show All Records Go to Record/Request/Page [First] Loop If [Invoice::Status = "Sent"] Omit Record Else Go to Record/Request/Page [Next Exit after last] End If End Loop

Which two statements are true at the conclusion of the script? (Choose two.)

- A. All "Sent" invoices have been omitted from the found set.
- B. The loop will never end if every invoice has a status of "Sent."
- C. The last record will not be omitted if it has a status of "Sent."
- D. The found set will consist of all records if there are no "Sent" invoices.

Correct Answer: AD

QUESTION 5

Which two statements are true in a FileMaker Pro 11 database containing scripts? (Choose two.)

- A. Multiple changes to multiple scripts can be saved using Save All Scripts.
- B. Saving changes to a currently running script will cause the execution of the script to halt.
- C. Running a script while other scripts have unsaved changes will cause all unsaved changes to be reverted.
- D. The Step Into button in the Script Debugger can be used to force the execution of a disabled script step.
- E. Closing the Manage Scripts window will prompt the user to save changes to the order or grouping of scripts.

Correct Answer: AB
