### QUESTION 1

A hosted FileMaker Pro 11 file contains a text field called ColorChoice that uses global storage. User A and User B are using the file. User A runs a script that changes the value in the ColorChoice field.

User A logs off and User B continues working. User B runs a script that modifies the ColorChoice field after User A has logged off.

If there is no other activity in the database, when User A logs back in, which value will User A see in the ColorChoice field?

- A. No value: the field will be empty.
- B. The last value that User A's script entered into the field.
- C. The last value that User B's script entered into the field.
- D. The last value that was saved in a session that was running on the file's host.

Correct Answer: D

---

### QUESTION 2

Which three statements about Instant Web Publishing (IWP) are true? (Choose three.)

- A. It is possible to alter the appearance of the default IWP Home Page.
- B. The appearance of most IWP pages can be altered using Cascading Style Sheets (CSS).
- C. It is possible to create a URL that links directly to an IWP published database, bypassing the IWP home page.
- D. It is possible to limit the list of databases visible on the IWP Home Page to just the specific databases the current user may access.
- E. It is possible to display databases from multiple instances of FileMaker Server on the IWP Home Page if the servers have been configured to work with a directory service.

Correct Answer: ACD

---

### QUESTION 3

The components of FileMaker Server 11 or FileMaker Server 11 Advanced may be installed on how many servers?

- A. 1 server only
- B. 1 or 2 servers only
- C. 1, 2, or 3 servers only
- D. 1, 2, 3, or 4 servers

Correct Answer: C

---

#### QUESTION 4

Which three methods can be used to access an ODBC data source from within FileMaker Pro 11? (Choose three.)

- A. Execute SQL script step
- B. Import Records script step
- C. File > Sharing > ODBC/JDBC menu item
- D. File > Import Records > Folder... menu item
- E. File > Manage > External Data Sources... menu item

Correct Answer: ABE

---

#### QUESTION 5

Which statement is true about supplemental fields added to a table occurrence based on an External ODBC Data Source that uses MySQL?

- A. These fields may be indexed.
- B. All nontext data types are converted to text.
- C. These fields may only be of type Summary or Calculation.
- D. These fields will be added to the table definitions within MySQL.
- E. These fields will be lost if the schema of the MySQL table is changed and then the Sync button in the FileMaker Pro Manage Database dialog is used.

Correct Answer: C
