QUESTION 1

You work as a Network Administrator for Peach Tree Inc. The company currently has a FAT- based Windows NT network. All client computers run Windows 98. The management wants all client computers to be able to boot in Windows XP Professional. You want to accomplish the following goals:

The file system should support file compression and file level security.

All the existing data and files can be used by the new file system.

Users should be able to dual-boot their computers.

You take the following steps to accomplish these goals:

Convert the FAT file system to NTFS using the CONVERT utility.

Install Windows XP and choose to upgrade the existing operating system during setup.

Which of the following goals will you be able to accomplish?

Each correct answer represents a complete solution. Choose all that apply.

- A. The file system supports file compression and file level security.
- B. All the existing data and files can be used by the new file system.
- C. Users are able to dual-boot their computers.
- D. None of the goals are accomplished.

Correct Answer: AB
