Correct Answer: ABC

QUESTION 5

You work as a Network Administrator for NetTech Inc. The company has a Windows Server 2008 domain- based network. The network contains four Windows Server 2008 member servers and 120 Windows Vista client computers. You are implementing a caching-only DNS server on one of the member servers. Your assistant wants to know about the caching-only DNS server. Which of the following statements about the caching-only DNS server are correct? Each correct answer represents a complete solution. Choose three.

- A. It hosts zones and authoritative for a particular domain.
- B. It reduces the amount of DNS traffic on a Wide Area Network (WAN)
- C. It is useful at a site where DNS functionality is needed locally but there is not a requirement for a separate domain for that location.
- D. It performs queries, caches the answers, and returns the results.

Correct Answer: BCD
