Correct Answer: D

QUESTION 5

You work as an Administrator for Bluesky Inc. The company has 145 Windows XP Professional client computers and eighty Windows 2003 Server computers. You want to install a security layer of WAP specifically designed for a wireless environment. You also want to ensure that the security layer provides privacy, data integrity, and authentication for client-server communications over a wireless network. Moreover, you want a client and server to be authenticated so that wireless transactions remain secure and the connection is encrypted. Which of the following options will you use to accomplish the task?

- A. Wireless Transport Layer Security (WTLS)
- B. Recovery Console
- C. Wired Equivalent Privacy (WEP)
- D. Virtual Private Network (VPN)

Correct Answer: A
