### QUESTION 1

Which of the following statements about the form-based authentication are true? Each correct answer represents a complete solution. Choose two.

- A. It provides a weaker security check than the HTTP Digest and HTTPS Client authentications.
- B. It requires a hidden field that supplies the login-constraint used by the application.
- C. It requires that the action of the login form must be j\_security\_check.
- D. It transmits username and password over the network in the form of Base64 encoding.

Correct Answer: AC

---

### QUESTION 2

Which of the following init() method calls initializes a cipher object with a key in the SECRET\_MODE?

- A. cipher.init(2, key);
- B. cipher.init(1, key);
- C. cipher.init(3, key);
- D. cipher.init(4, key);

Correct Answer: C

---

### QUESTION 3

What will happen when you try to compile and execute the following code?

```
class strconcat {public static void main(String args[]) {String str =" Correct answers";String perc  
="a"+"b";System.out.println(80+ \"%\" + str);}}
```

 Note. The ASCII value of % is 37.

- A. It will compile and execute successfully and will print 80 Correct answers as the output.
- B. It will compile and execute successfully and will print 117 Correct answers as the output.
- C. It will compile and execute successfully and will print 80% Correct answers as the output.
- D. It will fail to compile because % cannot be concatenated to a string.

Correct Answer: B

---

### QUESTION 4

You work as a Software Developer for NewTech Inc. You write a bean class using Enterprise

JavaBeans 3.0. The class uses the `@DeclareRoles` ("ADMIN, HR, DBA, USER") annotation to declare the security roles. The class contains a method named `showResult()`. You want to ensure that the ADMIN role is granted privilege to the `showResult()` method. Moreover, if a role that is not allowed to access the method tries to call the method, an error message must be shown. Assuming that there is no security-related element in the deployment descriptor, which of the following will you use to accomplish the task? Each correct answer represents a part of the solution. Choose two.

- A. The `isCallerInRole()` method
- B. The `getCallerPrincipal()` method
- C. The `@RolesAllowed("ADMIN")` annotation
- D. The `@PermitAll` annotation

Correct Answer: AC

---

#### QUESTION 5

Which of the following methods is used to authenticate the users, and if the user has not been authenticated, the method returns false?

- A. `getCallerPrincipal()`
- B. `getRemoteUser()`
- C. `isUserInRole()`
- D. `getCallerIdentity()`

Correct Answer: C
