QUESTION 1

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You have recently finished development of a Windows application using .NET Framework. Users report that

the application is not running properly. When the users try to complete a particular action, the following error message comes out:

Unable to find assembly \\'myservices, Version=1.0.0.0, Culture=neutral,

PublicKeyToken=29b5ad26c9de9b95\\'.

You notice that the error occurs as soon as the application tries to call functionality in a serviced component that was registered by using the following command:

regsvcs.exe myservices.dll

You must make sure that the application can call the functionality in the serviced component with no exceptions being thrown. What will you do to accomplish this task?

A. Run the command line tool: regasm.exe myservices.dll.

B. Copy the serviced component assembly into the C:\Program Files\ComPlus Applications fold er.

C. Run the command line tool: gacutil.exe /i myservices.dll.

D. Copy the serviced component assembly into the C:\WINDOWS\system32\Com folder.

Correct Answer: C

QUESTION 2

Peter works as a Software Developer for PatSoluTech Inc. He creates a .NET assembly using Visual Studio .NET. He wants to use this assembly in multiple .NET applications on a local computer. He decides to deploy the assembly into the global assembly cache (GAC). What will he do to accomplish the task?

Each correct answer represents a complete solution. Choose two.

A. Set the public attribute for the assembly.

B. Register the assembly within the GAC using Gacutil.exe.

C. Register the assembly within the GAC using Regasm.exe.

D. Give a strong name to the assembly.

Correct Answer: BD

QUESTION 3

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2008 as its application development platform. You create an ASP.NET Web application using the .NET Framework 3.5. The application contains two HTML pages named Error.htm and

PageNotFound.htm. You want to make sure that the following requirements are met:

l When any user requests a page that does not exist, the PageNotFound.htm page is

displayed.

l When any other error occurs, the Error.htm page is displayed. Which of the following code segments will you add to the Web.config file to accomplish this task?

A.

B.

C.

D.

Correct Answer: A
