QUESTION 1

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2005 as its application development platform. You are creating an application using .NET Framework 2.0. The application will be used by school children to read a sequential chain of characters. What will you do to accomplish this task?

A. Use the File class.

B. Use the TextWriter class.

C. Use the TextReader class.

D. Use the BinaryReader class.

Correct Answer: C

QUESTION 2

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET as its application development platform. You create an application using .NET Framework. The application is using an assembly. You want to ensure that the application provides the best performance. Security is not a consideration. Which of the following permission sets will you use to accomplish the task?

A. Everything

B. FullTrust

C. Nothing

D. Execution

E. LocalIntranet

F. Internet

Correct Answer: B

QUESTION 3

You work as a Web Application Developer for ABC Inc. The company uses Visual Studio .NET as its application development platform. You are creating a Web application using .NET Framework 2.0. The application will be used in Local Area Network (LAN). The Web application reads comma enclosed text files. The text files exist in a subdirectory under the Web application\\'s root directory. You must ensure that users never directly navigate to these files in a Web browser if they are not members of the Accounting role. You are required to write an ASP.NET HTTP handler that will use the FileAuthorizationModule class. Which of the following forms of authentications will you use?

A. Forms

B. Mutual

C. Microsoft Windows Integrated Security

D. Anonymous

Correct Answer: C

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You are creating an application using .NET Framework 2.0.

The application is used to exchange structured and type information on the Web using Soap. You want to use the BinaryFormatter and SoapFormatter classes to support RPCs and serialization of a graph of objects. Which of the following interfaces will the BinaryFormatter and SoapFormatter classes implement to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

A. IFormatter

B. IFormatable

C. IRemotingFormatter

D. IComparable

Correct Answer: AC

QUESTION 5

You work as a Software Developer for ABC Inc. You create an application, and you want to define a component for your application. In some deployments, the component will be deployed on the same computer as the application. In other deployments the component will be deployed on a separate computer. You create a Web service. You want a new object of the Web service to be created whenever a customer makes a call to the Web service. Drag and drop the appropriate statement to accomplish the task.

A. No Answer

Correct Answer: A
