### QUESTION 1

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You are creating an application using .NET Framework 2.0. You are using the StringBuilder class to string values. You want to create a StringBuilder object that can store 75 characters and should be initialized with "ABC". You also want to append a formatted string to the end of the StringBuilder object. Which of the following code segments will you use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

- A. `StringBuilder MyStrBuild = new StringBuilder(75); MyStrBuild.AppendFormat("ABC{0}{1}{2}", "INDIA", "\\U\\", "\\S\\");`
- B. `StringBuilder MyStrBuild = new StringBuilder("ABC", 75); MyStrBuild.Append("INDIAUS");`
- C. `StringBuilder MyStrBuild = new StringBuilder("ABC"); MyStrBuild.Capacity=75; MyStrBuild.AppendFormat("INDIA{0}{1}", "\\U\\", "\\S\\");`
- D. `StringBuilder MyStrBuild = new StringBuilder("ABC", 75); MyStrBuild.AppendFormat("INDIA{0}{1}", "\\U\\", "\\S\\");`

Correct Answer: CD

---

### QUESTION 2

John works as a Software Developer for CyberTech Inc. He creates an ASP .NET page named BookItemList.aspx, which displays a price list of computer books. Registered users have to first log on to the company's Web site in order to view the current price list of different computer books available on the Web site. Users want to maintain the page requests as long as they are accessing the Web page.

John wants to ensure that whenever the Web page BookItemList.aspx is posted back to the server, the price list should not be changed on the registered user's computer. He also wants to validate the page sent back to the server. Which of the following actions will John take to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

- A. Set the EnableEventValidation attribute to false.
- B. Set the EnableEventValidation attribute to true.
- C. Set the EnableViewState attribute to true.
- D. Set the EnableViewState attribute to false.

Correct Answer: BC

---

### QUESTION 3

You work as a Software Developer for ABC Inc. You use C# .NET to develop a windows application. The application will implement a role-based authorization scheme that is based on a Microsoft SQL Server database of user names. Users will enter their names in a text box named UserName. You must ensure that users are assigned the supervisor role and the PG role by default. Which of the following code segments will you use to accomplish this task?

- A. GenericIdentity identity = new GenericIdentity(Username.Text); string[] RoleArray = {"Supervisor", "PG"};  
GenericPrincipal principal = new GenericPrincipal(identity, RoleArray);
- B. GenericIdentity identity = new GenericIdentity(Username.Text); string[] RoleArray = {"Supervisor", "PG"};  
WindowsPrincipal principal = new WindowsPrincipal(identity);
- C. WindowsIdentity identity = new WindowsIdentity.GetCurrent(); string[] RoleArray = {"Supervisor", "PG"};  
GenericPrincipal principal = new GenericPrincipal(identity, RoleArray);
- D. WindowsIdentity identity = new WindowsIdentity.GetAnonymous(); string[] RoleArray = {"Supervisor", "PG"};  
WindowsPrincipal principal = new GenericPrincipal(identity, RoleArray);

Correct Answer: A

---

#### QUESTION 4

You work as an ADO.NET Application Developer for ABC Inc. The company uses Microsoft Visual Studio .NET 2008 as its application development platform. You create an ADO.NET application by using .NET Framework 3.5. You are using the System.Linq.Expressions namespace. You need to specify an expression that applies a delegate or lambda expression to a list of argument expressions. Which of the following classes will you use to accomplish the task?

- A. ListInitExpression
- B. InvocationExpression
- C. MemberAssignment
- D. NewArrayExpression

Correct Answer: B

---

#### QUESTION 5

Which of the following providers is a block cipher that encrypts and decrypts data in blocks of 8 bytes?

- A. RNGCryptoServiceProvider
- B. SHA1CryptoServiceProvider
- C. RC2CryptoServiceProvider
- D. RSACryptoServiceProvider

Correct Answer: C
