QUESTION 1

Julia works as a Software Developer for Mansoft Inc. She develops an application using Visual Studio .NET. The application uses a method named MyMethod, which is located in an unmanaged DLL. Julia wants MyMethod to require the application to allocate unmanaged memory, fill the data, and pass the memory address to the application. She also wants to ensure that on returning from MyMethod, the application de-allocates the unmanaged memory. What will Julia do to accomplish the task?

- A. Use the methods of the MemoryStream class.
- B. Use the Marshal class.
- C. Derive a new class from the Stream class, and override the allocation methods.
- D. Use a byte array.

Correct Answer: B

QUESTION 2

You work as a Software Developer for Hi-Tech Inc. You develop an application using Visual Studio .NET 2005. You create an unregistered COM DLL file named Com1.dll. You want to use this Com1.dll file in your application code. However, Com1.dll needs to be registered in the Windows Registry before it is used by the application. Which of the following tools will you use to accomplish the task?

- A. Wsdl.exe
- B. Regsvr32.exe
- C. Tlbimp.exe
- D. Disco.exe

Correct Answer: B

QUESTION 3

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You are creating an application using .NET Framework 2.0.

The application is used to exchange structured and type information on the Web using Soap. You want to use the BinaryFormatter and SoapFormatter classes to support RPCs and serialization of a graph of objects. Which of the following interfaces will the BinaryFormatter and SoapFormatter classes implement to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

- A. IFormatter
- B. IFormatable
- C. IRemotingFormatter

D. IComparable

Correct Answer: AC

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You create an ASP.NET Web application using .NET Framework 3.5.

The application rarely experiences errors that cannot be reproduced on a test environment. You are required to ensure that the application meets the following requirements:

I All unanticipated errors are logged.

I Logging is configured with a least amount of alteration to the application code.

What will you do?

- A. Override the base class for all forms in the application to add the Try/Catch blocks to all the major functionalities.
- B. Enable the element in the Web.config file and set the mode attribute to On .
- C. Enable the element in the Web.config file and set the mode attribute to RemoteOnly.
- D. Add an event handler for the Application.Error event to the Global.asax file of the application.

Correct Answer: D

QUESTION 5

Allen works as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. Allen creates an application that will be used to handle security information related to the company. He wants to secure the application by using the most secure authentication method. The method should have a strong key for encryption and send the encrypted password across the network. Which of the following authentication methods will Allen use to accomplish the task?

- A. Integrated Windows authentication
- B. Basic authentication
- C. Certificate-based authentication
- D. Digest authentication

Correct Answer: C
