QUESTION 1

Which of the following elements will you use to add a script to the ScriptManager declaratively?

- A.
- B.
- C.
- D.

Correct Answer: B

QUESTION 2

You work as a Software Developer for ABC Inc. The company's server room is in a highly secured environment. The company wants to ensure that the server room uses thumb impressions for authentication. Which of the following authentication methods will you suggest?

- A. SSL certificates
- B. Biometrics
- C. User policy
- D. Smart card
- E. Certificate

Correct Answer: B

QUESTION 3

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET as its application development platform. You create a class library using the .NET Framework. The library will be used to open the NSCs of computers. Later, you will set up the class library to the GAC and provide it Full Trust permission. You write down the following code segments for the socket connections:

```
SocketPermission permission = new SocketPermission(PermissionState.Unrestricted);  
  
permission.Assert();
```

A number of the applications that use the class library may not have the necessary permissions to open the network socket connections. Therefore, you are required to withdraw the assertion. Which of the following code segments will you use to accomplish the task?

- A. permission.PermitOnly();
- B. CodeAccessPermission.RevertDeny();

- C. `permission.Deny();`
- D. `CodeAccessPermission.RevertAssert();`
- E. `permission.Demand();`

Correct Answer: D

QUESTION 4

Maria works as a Software Developer for BlueWell Inc. She develops an application, named App1, using Visual C#.NET. The application displays employee details from a SQL Server database. Maria wants to use a string array, named MyArray, in the application code to store employee names. Which of the following statements will she use to declare MyArray?

- A. `string MyArray[9] = new string;`
- B. `string[] MyArray = new string[0 to 9];`
- C. `string[] MyArray = new string[9];`
- D. Option Base 1 `string[] MyArray = new string[9];`
- E. Option Base 0 `string[] MyArray = new string[9];`

Correct Answer: C

QUESTION 5

Allen works as a Software Developer for ManSoft Inc. He develops a Web application using Visual Studio .NET. He adds a Web reference to an XML Web service named MyWebService in the application. MyWebService includes a method named MyMethod, which takes user identification number as a parameter and returns a DataSet object containing user information. The System.ArgumentException is thrown if the user identification number is not positioned between 1 and

500. Allen writes a try/catch block to capture the exceptions thrown by the Web service. Which of the following exceptions will the try/catch block catch if a user calls MyMethod passing 501 as a parameter?

- A. `System.ApplicationException`
- B. `System.ArgumentNullException`
- C. `System.Web.Service.Protocols.SoapException`
- D. `System.Web.Service.Protocols.SoapHeaderException`

Correct Answer: C
