QUESTION 1

What are two benefits of using Hitachi Dynamic Provisioning (HDP)? (Choose two.)

- A. HDP improves performance by dynamically balancing I/Os across CLPRs.
- B. HDP improves performance by spreading host I/O patterns across many physical disks.
- C. HDP places cache memory in a central pool available only to dynamically provisioned volumes.
- D. HDP allows for dynamically adding more physical storage to the volume when an application requires extra capacity.

Correct Answer: BD

QUESTION 2

Which CLI command can be used to add an LDEV on a VSP?

- A. ldev create device
- B. raidcom add ldev
- C. comraid add device
- D. raidcom initialize ldev

Correct Answer: B

QUESTION 3

Your customer wants to connect multiple servers with different operating systems to the same port on a VSP. What is the first step when configuring the port?

- A. Map a LUN.
- B. Register a WWPN.
- C. Enable Port Security.
- D. Create a Host Group.

Correct Answer: C

QUESTION 4

A customer has virtualized both Clariion CX4 and USP V arrays in their data center behind a new VSP array. Within the VSP, they want to remove one of the virtualized LDEVs from the Clariion CX4.

Which Universal Volume Manager wizard should be used?

- A. Device Manager Wizard
- B. Delete External Volumes Wizard
- C. Disconnect Third-Party Devices Wizard
- D. Edit External WWNs Wizard

Correct Answer: B

QUESTION 5
