QUESTION 1

An advertising agency stores multiple digital images, video, audio, file shares, and database data that originate from 10 source servers. Backups of the data are written to an HP StoreOnce backup device. The agency is experiencing poor deduplication performance in their backup environment.

What should the agency do to optimize deduplication performance of their backup solution?

A. Enable software compression and synthetic full backups.

B. Group libraries/shares with similar data types together for the source servers.

C. Split virtual libraries across multiple Fibre Channel ports on the network.

D. Setup a separate library/share for the source servers.

Correct Answer: B

QUESTION 2

What should the customer use for critical data?

A. data deduplication

B. remote replication

C. snapclones

D. snapshots

Correct Answer: B

QUESTION 3

Government regulations require an HP client company to retain provably unmodified data. The company needs a solution that enables them to store write once, read many (WORM) files alongside read/write data and to retrieve the files quickly. They also need to use remote replication for the WORM files.

Which HP product provides this capability?

A. HP StoreAll Storage

B. HP 3PAR StoreServ 7000 Peer Motion

C. HP StoreVirtual Remote Copy

D. HP StoreOnce Catalyst

Correct Answer: A

http://h20195.www2.hp.com/V2/GetPDF.aspx%2F4AA2-9975ENW.pdf

Data retention via WORM file immutability and policies, data mobility via tiering and continuous remote replication.

QUESTION 4

A customer needs an enterprise backup system that will provide both VTL and NAS emulation with both scale-out and scale-up performance. The solution must offer a high level of redundancy and automated backup restart after failover. Which storage solution should the customer deploy?

A. HP StoreEver VLS9200 Virtual Library

B. HP StoreOnce D2D2502 Backup System

C. HP StoreEver RDX Removable Disk Backup

D. HP StoreOnce B6200 Backup System

Correct Answer: D

QUESTION 5

An enterprise has several remote locations with restricted access for the operators. They need a backup solutions with a maximum of 10 TB of backup per location. The data must be archived to tape daily at a central location for compliance purposes.

Which storage solution should the enterprise deploy?

A. HP 3PAR StoreServ

B. HP StoreAll

C. HP StoreVirtual

D. HP StoreOnce

Correct Answer: D
