-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

A trading company has a complex infrastructure with 12 data centers. The chief information officer (CIO) is looking for ways to maximize a reduction of OPEX and CAPEX. Which key initiative would help the CIO to achieve goal?

- A. Tiered storage
- B. Scale-out storage
- C. Software defined networking
- D. Consolidation

Correct Answer: D

---

### QUESTION 2

Scenario Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops, but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

Select the HP MSA configuration with SAS + SSD drives that will satisfy the customer requirements.

- A. HP MSA 1040, with converged controller and FC sfp
- B. HP MSA 1040, with GbE Ports
- C. HP MSA2040, with converged controller and Ethernet sfp

D. HP MSA2040, with SAS controller

Correct Answer: D

---

### QUESTION 3

A Customer plans to centralize and virtualize their user desktop using VMware View Solution for 300 users.

Their primary focus for this project is efficient backups. The customer design includes HP ProLiant BL460c Gen8 servers and an HP StoreVirtual solution. The customer needs an environment that uses a single management console for all

backup and replication activities and the ability to implement federated deduplication.

In your design, you want to add an HP StoreOnce B6200 Backup solution. Which HP StoreOnce emulation supports the customer need?

- A. VTL
- B. StoreOnce Catalyst
- C. Enterprise Tape Library
- D. NAS Share

Correct Answer: B

Failover manager

A failover manager is a special edition of a manager. Instead of running on a storage node, the failover manager runs as a virtual appliance. A failover manager's only function is maintaining quorum. When designing a SAN spanning two sites,

running a failover manager is recommended. The optimum placement of the failover manager is a third site. Place an even amount of managers in both sites and run the failover manager at an independent site.

"single management console for all backup and replication and the ability to implement federated deduplication", requires StoreOnce Catalyst. <http://bizsupport2.austin.hp.com/bc/docs/support/SupportManual/c01727773/c01727773.pdf>

#### QUESTION 4

A solution architect from an HP authorized reseller calls you with a need to configure HP BladeSystem and an HP StoreServ 7400 Storage System. He needs a bill of materials and a budgetary quote (List Price) for his colleague. Which tool do you recommend he use?

- A. HP Storage Sizing Tool
- B. HP Single Point of Connectivity (SPOCK)
- C. HP Salesbuilder for Windows
- D. HP Storage Product Selector

Correct Answer: C

<http://www.tools.hp.com> <http://sbw.cup.hp.com>

Features SBQWB - Configuration and quotation module Knowledge Base Files - Configuration database rules Price book files - The HP list price and contractual files Discount files - Channel partner-specific discount information SalesBuilder for Windows has two main components: the Configurator and the Quoter. <http://www.certificationexplorer.com/Documents/HP0-J64.pdf>

#### QUESTION 5

Which HP storage array features HP Express Query?

- A. HP 3PAR StoreServ

B. HP StoreAll

C. HP StoreEver

D. HP StoreVirtual

Correct Answer: B
