- A. mainframe support
- B. automated tiering
- C. clustered architecture
- D. static management

Correct Answer: C

---

### QUESTION 2

Your customer is concerned about IT spending and requests that all components used in the SAN design be fully utilized. What is the impact on scalability?

- A. High utilization does not impact scalability.
- B. Downtime will be increased when expanding.
- C. Expansion will require migration to a different topology.
- D. Expansion will not be possible.

Correct Answer: B

---

### QUESTION 3

The customer wants to implement an HP StoreOnce solution for the environment shown. You have been given the following information:

Each branch office has approximately 100 GB of data.

Philadelphia has approximately 2 TB data.

Pittsburg has approximately 1 TB data.

All backup data will be replicated back to the data center in Pittsburg.

Costs should be kept to a minimum but allow for the possibility of adding three more sites. Which HP StoreOnce solution should you propose for Pittsburg?

- A. HP StoreOnce B6200 Backup
- B. HP StoreOnce 4220 Backup
- C. HP StoreOnce 4420 Backup
- D. HP Storeonce 2620 Backup

Correct Answer: B

#### QUESTION 4

Identify the major benefits of NAS compared to a SAN.

- A. interoperability, lower total cost of ownership
- B. high data protection level, lower total cost of ownership
- C. speed, relative simplicity, proprietary solution

D. speed, reliability, high data protection level

Correct Answer: A

---
