-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

You present an HP 3PAR StoreServ concept to a customer. The customer wants to know how your design solves their technical and business needs and reduces their TCO .Map the HP 3PAR StoreServ solution component to the correct TCO element.

Select and Place:

You present an HP 3PAR StoreServ concept to a customer. The customer wants to know how your design solves their technical and business needs and reduces their TCO .Map the HP 3PAR StoreServ solution component to the correct TCO element.

Cost of unplanned downtime	Cage Availability
Power and cooling costs	Autonomic Groups
Improved service time	Thin Technologies
Administration costs	Adaptive Optimization

Select and Place:

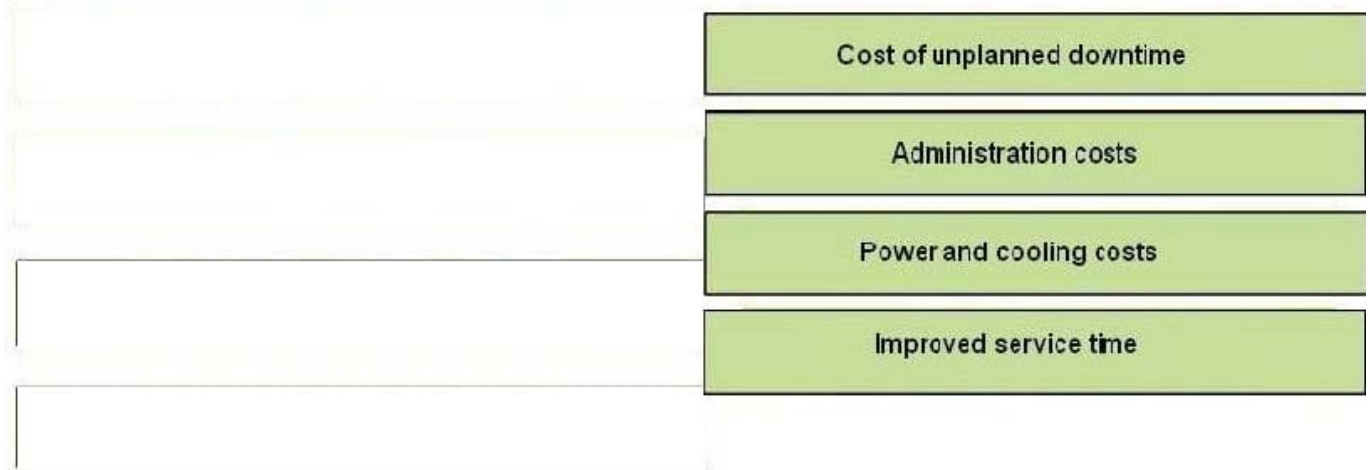

You present an HP 3PAR StoreServ concept to a customer. The customer wants to know how your design solves their technical and business needs and reduces their TCO .Map the HP 3PAR StoreServ solution component to the correct TCO element.

Cost of unplanned downtime	Cage Availability
Power and cooling costs	Autonomic Groups
Improved service time	Thin Technologies
Administration costs	Adaptive Optimization

Correct Answer:

You present an HP 3PAR StoreServ concept to a customer. The customer wants to know how your design solves their technical and business needs and reduces their TCO. Map the HP 3PAR StoreServ solution component to the correct TCO element.

## QUESTION 2

A customer running an enterprise database has heavy bandwidth traffic on their WAN link that they have isolated to HP 3PAR StoreServ Remote Copy replication between their primary and DR site. They are not concerned with the RTO but would like to improve the RPO.

Which recommendation should you make to decrease their WAN link traffic?

- A. Use synchronous mode replication for the entire database.
- B. Create more Remote Copy volume groups.
- C. Replicate just the database logs.
- D. Use synchronous long distance mode for the entire database.

Correct Answer: C

## QUESTION 3

Refer to the exhibit.

A customer reports poor application performance on their OLTP database, which is on an existing two-node HP P4500 Virtualization provides you with the chart in the exhibit. Which conclusion can you draw from this graph?

- A. Maximum acceptable response time is reached during business hours.
- B. Maximum acceptable response time is reached during backup.
- C. Optimal response time is not reached during the whole measure period.
- D. Optimal response time is reached during business hours.

Correct Answer: C

#### QUESTION 4

You are designing a new storage solution for a customer that must have the ability to reserve areas of cache memory for frequently accessed data for specific host LUNS. Which HP Storage system should you recommend to meet the customer requirements?

- A. HP XP P9500
- B. HP EVA P6550
- C. HP 3PAR StoreServ 10000

D. HP StoreVirtual 4530

Correct Answer: C

HP XP P9000 Cache LUN (also known as Cache Residency) Overview HP XP P9000 Cache LUN lets you reserve areas of memory cache on your HP XP P9500 Storage to store frequently accessed information. It improves file access times and enables faster data transfers. Assigning information to on-board cache speeds up access to your data because cache-resident data is available at host data transfer speeds for both read and write operations. XP P9000 Cache LUN redirects I/O requests from the XP P9500 drives to data locked in the array's cache. It is transparent, it is simple to implement, and the performance gains it delivers are immediate. Models Included with HP XP P9000 Array Manager - see section for more information Product Highlights XP P9500 Storage Firmware based Lock data in cache memory Flexible user configuration Scalable Licensing See Capacity-Licensed XP P9000 Software section

### QUESTION 5

D2D4312 Backup system in the main data center. After a presentation of the new HP StoreOnce Backup System and its functionalities the customer wants to use HP StoreOnce Catalyst with the HP Data Protector installation in the main data

center.

What has to be done to integrate this concept?

- A. Update existing hardware with additional RAM and drives for HP Catalyst compatibility.
- B. Trade in the branch office systems and propose HP StoreOnce 4210 Backup System.
- C. Upgrade the backup system Software in the data center to an HP StoreOnce Catalyst aware version.
- D. Recommend HP Data Protector StoreOnce replication licenses.

Correct Answer: C
