#### QUESTION 1

For which protocol(s) can automatic transactions per step be defined?

- A. all protocols
- B. Web Protocol only
- C. Citrix Protocol only
- D. SAP Protocol only

Correct Answer: B

---

#### QUESTION 2

When choosing between HTML-based and URL-based recording modes for Web protocol, robustness and maintainability of the recorded script should be considered. What would cause the replay failure of a script recorded in HTML mode?

- A. a change in the links URL
- B. a missing image in the page, if not linked
- C. a change in the links text
- D. an extra resource in the page

Correct Answer: C

---

#### QUESTION 3

What do transaction times measure?

- A. transmission and response time between client and server
- B. time spent only on client
- C. network time only
- D. database time only

Correct Answer: A

---

#### QUESTION 4

What is a data parameter type?

- A. Sequential Number
- B. Scenario ID
- C. Rendezvous
- D. File

Correct Answer: D

---

#### QUESTION 5

You have just completed an advanced script that must get a real-time security encryption key for a login function. The security encryption key is obtained by loading a custom DLL using `rc=lr_load_dll("SecureAcces.dll")` and then calling a custom function. The login logic works on the Controller where you are developing the VuGen script, but when replaying on remote Load Generators, the script fails with error code `rc=11`.

How can you fix this error 11? (Select two.)

- A. The full path should have been specified. You change the command to `lr_load_dll("c:\temp\SecureAcces.dll");`
- B. In the Controller, you select the script on the Design tab, then click the buttons Details, More, Files, Add and add the DLL
- C. `\temp\SecureAcces.dll`.
- D. In the VuGen Run-time Settings, you select Additional attributes and click Add, then you select the DLL `c:\temp\SecureAcces.dll` so it can be found by all machines.
- E. The DLL name was misspelled. You correct the error and rerun the scenario.
- F. You add the DLL `c:\temp\SecureAcces.dll` using VuGen menu File > Add Files to Script.

Correct Answer: BE
