Following Questions and Answers are all new published by HP Official Exam Center

QUESTION 1

Which situations require parameterization? (Select four.)

A. unique constraint

B. type of application

C. date constraint

D. data dependency

E. type of database

F. data caching

G. clustered database

Correct Answer: ACDF

QUESTION 2

What does the window "Run-time Settings: General: Log" allow you to do? (Select three.)

A. Configure the script to log only if there are no errors.

B. Set the log level (standard or extended).

C. Set the percentage of Vusers that will log in the test run execution.

D. Turn on / off logging.

E. Enable or disable Transaction Response Time logging.

F. Enable or disable Advanced Trace.

Correct Answer: BDF

QUESTION 3

You have just completed an advanced script that must get a real-time security encryption key for a login function. The security encryption key is obtained by loading a custom DLL using rc=lr_load_dll("SecureAcces.dll") and then calling a

custom function. The login logic works on the Controller where you are developing the VuGen script, but when replaying on remote Load Generators, the script fails with error code rc=11.

How can you fix this error 11? (Select two.)

A. The full path should have been specified. You change the command to lr_load_dll("c:\temp\SecureAcces.dll");

B. In the Controller, you select the script on the Design tab, then click the buttons Details, More, Files, Add and add the

DLL

C. \temp\SecureAcces.dll.

D. In the VuGen Run-time Settings, you select Additional attributes and click Add, then you select the DLL c:\temp\SecureAcces.dll so it can be found by all machines.

E. The DLL name was misspelled. You correct the error and rerun the scenario.

F. You add the DLL c:\temp\SecureAces.dll using VuGen menu File > Add Files to Script.

Correct Answer: BE

QUESTION 4

Load Generator hosts are experiencing heavy memory usage.

Which Run-time Settings optimization will reduce memory usage of each of the running Vusers?

A. Miscellaneous: Run Vuser as a process

B. Miscellaneous: Run Vuser as a thread

C. Think time: Ignore think time

D. Log: Extended log

Correct Answer: B

QUESTION 5

When should you check the "Record the application startup" box?

A. when you are about to record multiple actions

B. when you want to navigate to a specific point in the application before you begin recording

C. when you record into an existing script

D. when you record a new script

Correct Answer: D
