QUESTION 1

You add the logic `lr_message("the message");` to your script but you do not see any messages in the Output window while running the scenario in the Controller. What should you do?

- A. Add the code `lr_start_messages(1);` before the `lr_message("the message");`
- B. Change the logging options in the Controller's Run-time Settings from "only when an error occurs" to "Always Send" and "Standard Log."
- C. Add the code `lr_set_debug_message(LR_MSG_CLASS_EXTENDED_LOG | LR_MSG_CLASS_FULL_TRACE, LR_SWITCH_ON);` to the line before the `lr_message("the message");`
- D. Highlight the script in the Controller, click Details, and click Refresh Log Options.
- E. Because only 10% of the messages are logged, wait for the test to run longer.

Correct Answer: B

QUESTION 2

Your business process is composed of five sequential, logical steps:

1. Login
2. customer search
3. customer selection
4. customer update
5. logoff

You want to be able to measure end-to-end response times for each logical step. To accomplish this, what will you set them as?

- A. distinct functions
- B. distinct transactions
- C. separate actions
- D. distinct Vuser scripts

Correct Answer: B

QUESTION 3

What should you do to try different Recording Options for the same business process?

- A. Record the business process again

- B. Click on Tools > Regenerate Scripts
- C. Copy the Scripts and manually change the contents.
- D. Record the business process using a different protocol.

Correct Answer: B

QUESTION 4

What does the lr_advance_param command do?

- A. advances all data rows between iterations
- B. immediately advances the current data row for the all columns in a data table
- C. advances a given column's data row for only one column between iterations
- D. immediately advances the current data row for only one column in a data table

Correct Answer: D

QUESTION 5

When choosing between HTML-based and URL-based recording modes for Web protocol, robustness and maintainability of the recorded script should be considered. What would cause the replay failure of a script recorded in HTML mode?

- A. a change in the links URL
- B. a missing image in the page, if not linked
- C. a change in the links text
- D. an extra resource in the page

Correct Answer: C
