#### QUESTION 1

During a system maintenance window, what should a system administrator do to inhibit network logins from non-root users?

- A. Set NOL OG1N-1 in /etc/default/security.
- B. Edit /etc/login and add "root" on a single line.
- C. Sri NOL OGIN-1 in /etc/default/security and touch /etc/nologin
- D. Use the pwconv utility to create /etc/shadow

Correct Answer: D

---

#### QUESTION 2

A system administrator creates a new file using the cp command. This is a duplicate of an existing file. Who will be the owner of this new file?

- A. The nobody user
- B. The owner of the original file
- C. The owner of the directory that the file is copied to
- D. The system administrator

Correct Answer: C

---

#### QUESTION 3

In preparation for a maintenance window, a system administrator wants to download and test the latest ONCplus Release. What is the correct way to accomplish this task?

- A. Obtain independent software units from the HP Software Depot
- B. Download it from the HP Support Center in the patch management section
- C. Call the local Support Center to get the depot provided by a personal ftp
- D. Use Software Assistant (SWA) to obtain a customized depot for the test system

Correct Answer: B

---

#### QUESTION 4

Which configuration files does the /etc/rc.config.d directory contain?

- A. Files for remote console
- B. Files for the startup scripts
- C. Files for user accounts
- D. Files that can be deleted

Correct Answer: B

---

#### QUESTION 5

Dug to Linux experience, the system administrator executes `hostname -A` on an HP-UX server. What is the result of this action?

- A. The server's hostname is set to -A.
- B. The shell returns a syntax error because -A is an invalid option for the `hostname` command in HP-UX
- C. The output will only include the primary hostname
- D. The output is identical to what is seen in Linux

Correct Answer: B
