QUESTION 1

Which functionality is enabled with the HP Insight Control for System Center management add- on?

A. Deliver bare metal deployment of Hyper-V hosts with Server Automation

B. Live migration of virtual machines between AMD and Intel processor platforms

C. proactively automate movement of virtual machines based on pre failure alerts from HP ProLiant servers

D. Provides the ability to lock-step mirror virtual machines through the HP c-Class midplane

Correct Answer: C

http://h20000.www2.hp.com/bc/docs/support/SupportManual/c03020752/c03020752.pdf From "HP Insight Control for Microsoft System Center integration overview" Document. By incorporating the Insight Control for System Center extensions, you can use the System Center consoles or the following tasks, which Figure 1 also shows:

Bare metal OS deployment

When using the ProLiant Server OS Deployment Toolkit with SCCM, you can automatically deploy bare-metal servers from pre-deployment hardware and BIOS configuration to the post-OS driver and agent installation.

Automated virtual machine management

When using the PRO management pack in SCVMM, you can move virtual machines either automatically or manually if a host hardware pre-failure event occurs.

QUESTION 2

Which UEFI shell command should be used to verify the firmware on the HP Integrity Blade LOMs and installed mezzanine card?

A. devtree

B. devices

C. info io

D. drivers

Correct Answer: C

http://h20000.www2.hp.com/bizsupport/TechSupport/Document.jsp? prodSeriesId=447681andobjectID=c00273667

EFI Commands

The following table lists EFI commands for the HP Integrity rx4640 Server.

EFI Shell Command	BCH Command Equivalent	BCH Command Parameters	Definition
time	Time	[cn:yr:mo:dy:hr:mn[:ss]]	Read or set the real time clock
Information			
info all	ALL		Display all system information
info boot	BootINfo		Display boot-related information
info cpu	Cache		Display cache information
info chiprev	ChipRevisions		Display revision number of major VLSI
MP command	FRU		Display FRU Information
info fw	FwrVersion		Display firmware version for PDC, ICM, and complex
info io	IO		Display firmware version for PDC, ICM, and complex
LanAddress	LanAddress		Display core LAN station address
info mem	Memory		Display memory information
info cpu	Processor		Display processor information
Service			
errdump clear	CLEARPIM		Clear (zero) the contents of PIM
mm	MemRead	[] []	Read memory locations scope of page deallocation
PDT	PDT		Display or clear the page deallocation table
errdump mca / errdump cmc / errdump init	PIM	[] [HPMC|LPMC|TOC|ASIC]]	Display PIM information (processor internal memory)

QUESTION 3

What is called the concept of back up on a tape each night?

A. System Recovery

B. Business Continuity

C. Backup Strategy

D. Replication

Correct Answer: C

QUESTION 4

You configured and installed the VCA on a server, but are unable to access VCRM using the administrator login credentials. What should you do?

A. Log in using a separate network user login and password other than administrator

B. Wait ten minutes for it to propagate through the network

C. Reboot the system

D. Change the VCRM trust relationship to Trust

Correct Answer: D

http://www.hp.com/wwsolutions/misc/hpsim-helpfiles/mxhelp/mxportal/en/ admin_security_about_settingUpTrustRelationships.html

For Single Login and Secure Task Execution (STE) to work, the managed system must be running a supported agent and be configured to trust the HP Systems Insight Manager server.

Three levels of trust configuration are available.

Trust All. The managed system trusts any HP Systems Insight Manager server, without verifying its digital signature. This configuration is the easiest to enable, but it leaves your managed system open to any HP Systems Insight Manager

server request, including requests from HP Systems Insight Manager servers installed in a test environment or bogus requests formatted to appear as valid requests. Select this option with caution.

Trust By Name. The managed system trusts any of the HP Systems Insight Manager servers specifically named in the list without verifying the digital signature. This configuration is still susceptible to accepting bogus requests formatted as

valid requests from the named servers.

Select this option with caution.

Trust By Certificate. The managed system only trusts HP Systems Insight Manager servers in the certificate list and verifies its digital signature. This configuration is the most secure option because it validates the digital signature of the

request against a locally stored certificate, authenticating the sender and ensuring message integrity.

QUESTION 5

While analyzing a customer\\'s business requirements, you learn that they would like to consolidate their interconnect equipment and allocate network bandwidth based on application requirements. Which interconnect technology should you recommend?

A. HP GBE2c Layer 2/3 Ethernet Blade Switch

B. HP InfiniBand interconnect

C. HP Virtual Connect Flex-10

D. HP Virtual Connect 6120 Blade

E. HP 6120XG Blade Switch

Correct Answer: C
