QUESTION 1

What is an accurate description of a CPG and its features?

- A. A CPG is a policy that helps you select free chunklets from physical disks within the HP 3PAR StoreServ array. Both full and thin provisioned volumes can be drawn from the same CPG.
- B. A CPG is a method of creating a disk pool from which hosts are allocated space; the optimum number of drives in a CPG is 56
- C. A CPG is pool-based, and space is reserved upfront for each CPG created The CPG will grow as needed according to its predefined growth increment
- D. A CPG is a template that groups the characteristics of a volume, such as disk media type, disk speed, RAID level, and availability level. A CPG can contain two types of disk media.

Correct Answer: D

QUESTION 2

What is significant about controller slots 1, 4, 2, and 3 on an HP 3PAR 10400?

- A. The slots are RCIP, Management, and Console serial slots.
- B. The slots are not accessible and are reserved for future use.
- C. The slots are recommended for Remote Copy FC.
- D. The slots are for disk chassis FC.

Correct Answer: A

QUESTION 3

What must you consider when preparing an HP 3PAR StoreServ system for a first-time installation?

- A. The HP 3PAR SmartStart DVD has to be used to set up the storage system for the first time.
- B. The 60-days-Instant-On licenses have to be generated before the storage system is set up.
- C. The Virtual Service Processor has to be in place to set up the HP 3PAR StoreServ storage system
- D. The system has two serial numbers, and the 3PAR serial number is used during system setup

Correct Answer: A

QUESTION 4

You are running the SmartStart Installation procedure to install an HP StoreServ 7400 Storage System. Which users,

created during the installation process, will have access to this storage system? (Select two.)
