QUESTION 3

What does "SMS" stand for?

A. System Management Solution

B. Safe Management System

C. Security Management System

D. Safety Management System

Correct Answer: C

SMS stands for the Security Management System, which is a central management point for managing different
TippingPoint appliances, monitoring events and scheduling reports. Reference: http://csrc.nist.gov/groups/STM/cmvp/
documents/140-1/140sp/140sp1545.pdf

QUESTION 4

Which product is part of HP TippingPoint\'s overall solution?

A. Intrusion Prevention System

B. Systems Management Solution

C. Threat Diagnosis Center

D. Intrusion Detection System

Correct Answer: D

QUESTION 5

Which value is required during the IPS OBE process?

A. filter changes

B. serial number

C. TOS version number

D. security level

Correct Answer: D

Before you begin, ensure that a console is connected to the TippingPoint IPS device via the console port,

and that the console is powered on and ready. When you turn on the IPS, you will see several status

messages before the OBE setup wizard initializes. When the OBE setup wizard runs, the following screen

appears:

Welcome to the TippingPoint Technologies Initial Setup wizard. Press any key to begin the Initial Setup

Wizard or use LCD panel. Press any key to begin the OBE setup wizard. The following message appears:

You will be presented with some questions along with default values in brackets[]. Please update any

empty fields or modify them to match your requirements. You may press the ENTER key to keep the

current default value. After each group of entries, you will have a chance to confirm your settings, so don\'t

worry if you make a mistake. Continue to the following section for instructions on account security.

Account Security Level

The Security Level dialog sets the security level that restricts user names and passwords. The default

security level is Level 2, but you have the option to select one of three available levels:

There are three security levels for specifying user names and passwords:

Level 0: User names and passwords are unrestricted. Level 1: Names must be at least 6 characters long;

passwords at least 8. Level 2: In addition to level 1 restrictions, passwords must contain:

-

at least 2 alpha characters

-

at least 1 numeric character

-

at least 1 non-alphanumeric character Please specify a security level to be used for initial super-user name and password creation. As superuser, you can modify the security level later on via Command Line Interface (CLI) or Local Security Manager (LSM). Security level [2]: Reference: http://www.nfwest.com/tp/docs/techd291-tos3-1_commandref.pdf
