QUESTION 1

What does HP Systinet provide to all the stakeholders for composite applications? (Select three.)

- A. Control
- B. Visibility
- C. Reliability
- D. Availability
- E. Predictability
- F. Trust

Correct Answer: BDE

QUESTION 2

Which statement is based on initial customer case studies to describe the benefits of HP ALM?

- A. This latest solution is an excellent example of HP understanding our business goal of being more efficient and flexible and delivering exactly the right adaptive infrastructure to accomplish it.
- B. HP helped us optimize our current production plan and improve resource utilization, giving us better yield. We are now in a better position to provide estimated commitment to future orders because our production is near real-time, based on actual movement within the production line.
- C. HP ALM accelerates application transformation by empowering applications teams to plan, build, and deliver modernized applications to operations up to two times faster with optimized quality.
- D. Implementing HP Application and Performance Management Software for Composite Application Management and HP Real User Monitor has increased the transaction success rate by 10% and application performance by 5%.

Correct Answer: C

QUESTION 3

Which capabilities of HP ALM enable customers to deliver applications faster and perform better? (Select three.)

- A. Test management and execution
- B. Defect management and tracking
- C. Configuration management
- D. Development management and integrations
- E. Asset management
- F. Desktop automation

Correct Answer: ABD

QUESTION 4

Which items best describe HP Software's solutions and benefits for managing security within ALM? (Select three.)

- A. The integration of HP Fortify Software Security Center Solutions into ALM11 or QC10 bridges the functional gap between the IT security and pre-production testing (OA) and RandD (development) teams by facilitating defect tracking, which improves the overall quality, performance, and security of production applications.

- B. HP Fortify Software Security Center identifies and eliminates risk in existing applications and prevents the introduction of risk during application development.
- C. HP Fortify Software Security Center provides a dashboard view of the security identifies and eliminate risk in database applications and prevents the introduction of risk during application development.
- D. Secure ALM increases development productivity by automatically identifying and resolving security defects in production environments using Static Application Security Testing technology to reduce the total cost of security in production.
- E. As part of a comprehensive secure software development program, Fortify's Static and Dynamic Application Security Testing solutions not only improve the security of the application but also increase development productivity by reducing the need to resolve security defects once in production.
- F. HP Fortify Software Security Center identifies and effectively isolates vulnerable applications by the use of Threat Containment technology and intrusion detection systems, which results in more stable system availability and improved performance.

Correct Answer: ABD

QUESTION 5

What is the most accurate statement that describes the value proposition for the HP Unified Functional Test?

- A. It easily incorporates changes and sustains simulation models.
- B. It protects business critical applications from advanced cyber attacks by removing security vulnerabilities from software.
- C. It ensures higher quality by automating end-to-end testing.
- D. It mitigates risk by identifying the cause of performance bottlenecks and reducing MTTR.

Correct Answer: C
