QUESTION 1

Indicate whether each listed component requires downtime during the DL380p G8 upgrade process.

Hot Area:

| memory | Requires downtime |
| | Does not require downtime |

| power supply module | Requires downtime |
| | Does not require downtime |

| CPU | Requires downtime |
| | Does not require downtime |

| hard disk | Requires downtime |
| | Does not require downtime |

| FC HBA | Requires downtime |
| | Does not require downtime |

Hot Area:

| memory | Requires downtime |
| | Does not require downtime |

| power supply module | Requires downtime |
| | Does not require downtime |

| CPU | Requires downtime |
| | Does not require downtime |

| hard disk | Requires downtime |
| | Does not require downtime |

| FC HBA | Requires downtime |
| | Does not require downtime |

Correct Answer:

memory	
	Requires downtime
	Does not require downtime

power supply module	
	Requires downtime
	Does not require downtime

CPU	
	Requires downtime
	Does not require downtime

hard disk	
	Requires downtime
	Does not require downtime

FC HBA	
	Requires downtime
	Does not require downtime

QUESTION 2

A customer has a DL380p Gen8 base unit with 1 CPU, 4 x 16 GB RDIMM with 24 total DIMM slots. Which memory option is valid?

A. Remove the existing memory and populate all memory slots with UDIMMS memory.

B. Populate the remaining 20 memory slots with additional RDIMM memory.

C. Populate another 8 memory slots with additional RDIMM memory.

D. Populate the remaining 20 memory slots with additional UDIMM memory.

Correct Answer: C

/ Rules for populating processors and DIMM slots

*

 Install DIMMs only if the corresponding processor is installed.

*

 If only one processor is installed in a two-processor system, only half of the DIMM slots are available.

/ DL380p can use one or two processors.

Note:

*

 ProLiant Gen8 servers support four different DIMM types Unbuffered with ECC Memory (UDIMMs), Registered Memory (RDIMMs), Load Reduced Memory (LRDIMMs), and HyperCloudMemory (HDIMMs).

*

 ProLiant Gen8 servers, we recommend populating all memory channels whenever possible. This ensures the best memory performance.

QUESTION 3

Where can the server PSP be chosen for version comparison and updates?

A. VCEM

B. SIM VCRM

C. SMH

D. VCA

Correct Answer: D

The Version Control Agent (VCA) is an HP Insight Management Agents that is installed on a server to enable you to see the HP software and firmware that is installed on that server.

Note:

* ProLiant Support Packs (PSP) represent operating system (OS) specific bundles of optimized drivers, utilities, and management agents. These bundles are tested together to ensure proper installation and functionality. PSPs are released concurrently with HP\'s SmartStart, and can also be released outside of the SmartStart cycle and made available on the HP ProLiant Support Pack download selection pages or at HP Insight Foundation website.

QUESTION 4

A customer has an HP Smart Array P420i Zero Memory Controller and the current configuration has the minimum number of drives for RAID 1 and one hotspare.

What is the minimal requirement to upgrade it to RAID 5?

A. One more hard disk

B. One more hard disk with FBWC

C. FBWC only

D. Two more hard disks

Correct Answer: A

RAID 5 requires 3 hard drives, whereas RAID 1 requires only two. One extra hard drive is required here. Note:

*

 Flash Backed Write Cache (FBWC).

*

 RAID5 is available on the SA P420/P420i with a minimum of 512MB cache.

Incorrect:

Not C:

RAID 6 requirement: Minimum of 512 MB FBWC with SuperCap and Smart Array Advanced Pack License 2.0 key option upgrades

---

QUESTION 5

You have a P421/1GB FBVVC with three hard disks configured as RAID 5. What is the minimum requirement to upgrade the disk\\'s configuration to RAID 60? (Select two.)

A. BBWC

B. Smart Array Advanced Pack 2.0

C. Five more hard disks

D. Three more hard disks

Correct Answer: BC

B: HP Smart Array Advanced Pack (SAAP) delivers value added software features with the Smart Array Controller, which will further enhance performance, reliability, and availability of customer data. These features will be delivered to the

customer via a license key which enables the functionality on the Smart Array Controller Hardware. These licensed features provides an easy key activation to enable features such as added RAID protection with RAID 6 (Advanced Data

Guarding) and 60 providing advanced drive/ data protection. Other features include more secure methodology to erase drives offering more security, performance improvements for video streaming among other advancements.

C (not D): RAID 60 requires 8 hard drives minimum.
