QUESTION 1

The High Point grocery store has implemented a frequent buyer program. Discounts on various products will be provided as an incentive for customers to register in the program. The Frequent Buyer (FB) application is being built to collect and store the customer information and to keep track of the purchasing patterns of the customers.

QUESTION 2

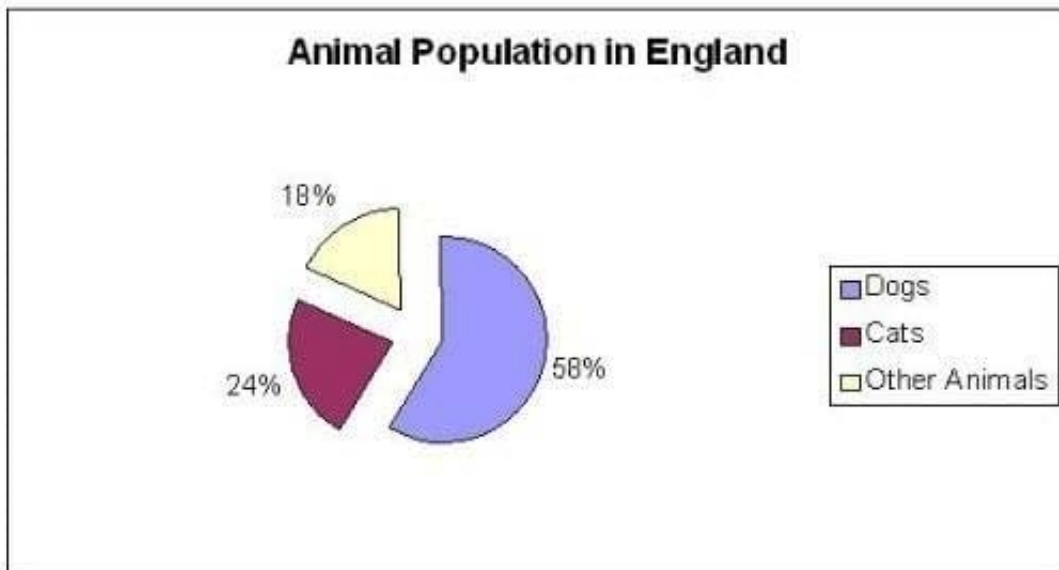

Which statement applies when counting FTRs for an EO?

- A. Count one FTR for each base functional component that is maintained by the EO
- B. Count one FTR for each unique data function that is accessed by the EO
- C. Count one FTR for each unique base functional component that is accessed by the EO
- D. Count one FTR for each data function that is written to by the EO

Correct Answer: B

QUESTION 3

How would you count the pie chart below?

- A. 1 EO with 1 DET
- B. 1 EO with 2 DETs
- C. 3 EOs
- D. None of the above

Correct Answer: B

QUESTION 4

Control information is data that:

- A. influences an elementary process
- B. specifies what data is to be processed
- C. specifies when and how data is to be processed
- D. All of the above

Correct Answer: D

QUESTION 5

Which of the following rules apply when counting DETs for both EOs and EQs?

- A. Count one DET for each unique user recognizable, non-repeated attribute that crosses the boundary
- B. Count one DET for each literal such as report titles or screen identifiers
- C. Count one DET for each attribute generated within the boundary and saved to an ILF without exiting the boundary

D. Count one DET for each navigation aid used to navigate within a list

Correct Answer: A
