### QUESTION 1

You are the owner of Speedelivery courier service. Because of your company's growth you have to think about information security. You know that you have to start creating a policy. Why is it so important to have an information security policy as a starting point?

- A. The information security policy gives direction to the information security efforts.
- B. The information security policy supplies instructions for the daily practice of information security.
- C. The information security policy establishes which devices will be protected.
- D. The information security policy establishes who is responsible for which area of information security.

Correct Answer: A

---

### QUESTION 2

Which of the following measures is a preventive measure?

- A. Installing a logging system that enables changes in a system to be recognized
- B. Shutting down all internet traffic after a hacker has gained access to the company systems
- C. Putting sensitive information in a safe
- D. Classifying a risk as acceptable because the cost of addressing the threat is higher than the value of the information at risk

Correct Answer: C

---

### QUESTION 3

You have a small office in an industrial area. You would like to analyze the risks your company faces. The office is in a pretty remote location; therefore, the possibility of arson is not entirely out of the question. What is the relationship between the threat of fire and the risk of fire?

- A. The risk of fire is the threat of fire multiplied by the chance that the fire may occur and the consequences thereof.
- B. The threat of fire is the risk of fire multiplied by the chance that the fire may occur and the consequences thereof.

Correct Answer: A

---

### QUESTION 4

You are the owner of a growing company, Speedelivery, which provides courier services. You decide that it is time to draw up a risk analysis for your information system. This includes an inventory of the threats and risks. What is the relation between a threat, risk and risk analysis?

- A. A risk analysis identifies threats from the known risks.
- B. A risk analysis is used to clarify which threats are relevant and what risks they involve.
- C. A risk analysis is used to remove the risk of a threat.
- D. Risk analyses help to find a balance between threats and risks.

Correct Answer: B

---

#### QUESTION 5
