QUESTION 1

Which three actions should be used when initially implementing Junos Screen options? (Choose three.)

A. Deploy Junos Screen options only in functional zones.

B. Deploy Junos Screen options only in vulnerable security zones.

C. Understand the behavior of legitimate applications.

D. Use the limit-session option.

E. Use the alarm-without-drop option.

Correct Answer: BCE

QUESTION 2

Click the Exhibit button.

```
user@host> show configuration security nat
pool TO_INTERNET {
    address {
        3.3.3.100/32 to 3.3.3.110/32;
    }
    host-address-base 10.200.104.21/32;
}
rule-set TO_INTERNET-1 {
    from interface ge-0/0/4.104;
    to zone UNTRUST;
    rule 1 {
        match {
            destination-address 0.0.0.0/0;
        }
        then {
            source-nat {
                pool {
                    TO_INTERNET;
                }
            }
        }
    }
}
rule-set TO_INTERNET-2 {
    from zone TRUST;
    to zone UNTRUST;
    rule 2 {
        match {
            source-address 10.200.104.0/24;
        }
        then {
            source-nat {
                interface;
            }
        }
    }
}
```

Users are able to access hosts on the Internet, however, they are using the TO_INTERNET pool instead of the IP address associated with the external interface for the translations.

Referring to the exhibit, why is the traffic using the source NAT pool instead of the IP address that is associated with the external interface for translations on the SRX Series device?

A. The INTERNET-1 rule set is listed before the INTERNET-2 rule set in the configuration hierarchy.

B. The INTERNET-2 rule set is not configured with a destination address of 0.0.0.0/0 in the match criterion.

C. The INTERNET -l rule set is configured with the more specific from criterion.

D. The INTERNET -2 rule set is configured with the more specific from criterion.

Correct Answer: A

QUESTION 3

Click the Exhibit button.

```
user@host> show chassis cluster status
Cluster ID: 1
Node name                 Priority     Status    Preempt  Manual failover

Redundancy group: 0 , Failover count: 1
    node0                   200        primary   no       no
    node1                   100        secondary no       no

Redundancy group: 1 , Failover count: 0
    node0                   0          secondary no       no
    node1                   100        primary   no       no
```

Referring to the exhibit, assume the node0 impairment was caused by a reth interface going down. When the interface comes back online, which statement would be correct?

A. If node0 is configured with priority 200, it will take over as redundancy group 1 primary.

B. If node0 is configured with priority 1. It will take over as redundancy group 1 primary.

C. Node0 will take over as primary for redundancy group 1 regardless of node\\'1s priority.

D. Node1 will stay primary for redundancy group 1 regardless of node0\\'s priority.

Correct Answer: D

QUESTION 4

Where do you configure SCREEN options?

A. zones on which an attack might arrive

B. zones you want to protect from attack

C. interfaces on which an attack might arrive

D. interfaces you want to protect from attack

Correct Answer: A

QUESTION 5

What are two system-defined zones? (Choose two.)

A. null zone

B. system zone

C. Junos host zone

D. functional zone

Correct Answer: AC
