### QUESTION 1

You are configuring the Junos Pulse client to be installed and launched the first time the user logs in to the Junos Pulse Secure Access Service start page. What should you do?

- A. Under the User Role > VPN Tunneling; select Junos Pulse and Auto-launch.
- B. Under Junos Pulse > Connections; your connection set, select Dynamic connections.
- C. Under Junos Pulse > Connections; create a connection set of the SA or IC type. The client will be installed and executed automatically.
- D. Under Junos Pulse > Components; your component set, select All components.

Correct Answer: A

---

### QUESTION 2

Which two features does the Junos Pulse Secure Access Service offer that enhance security on the corporate network? (Choose two.)

- A. enforcement of endpoint compliance
- B. secure OSPF routing
- C. firewall filtering
- D. support for multiple client types

Correct Answer: BC

---

### QUESTION 3

You want to use ESP for your VPN Tunneling transport mechanism.

Which port must you have open on your firewall to the Junos Pulse Secure Access Service in a default configuration?

- A. UDP 500
- B. TCP 500
- C. UDP 4500
- D. TCP 4500

Correct Answer: C

---

#### QUESTION 4

You have configured a Web Resource Profile to allow access to your company's Intranet site and assigned the Web role to the profile. A bookmark to the site was configured and will be displayed on the user's start page. You also enabled the Web URL browse bar. You did not modify any of the default auto-allow policies.

What will users in the Web role be able to access?

- A. Users will not be able to access any Web sites.
- B. Users will have access to any Web site in the domain.
- C. Users will only have access to the bookmark on the start page.
- D. Users will need the administrator to create additional bookmarks to access other sites.

Correct Answer: B

---

#### QUESTION 5

Remote access users must maintain connectivity to printers on their local network when they launch their VPN tunnel and are connected with split tunneling disabled.

In the Admin UI, which VPN Tunneling setting would allow this?

- A. Enable Tunnel routes under Route Precedence.
- B. Enable Route Monitor.
- C. Enable Endpoint routes under Route Precedence.
- D. Disable Route Monitor.

Correct Answer: C
