-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which IS-IS PDU is used to request a retransmission of a missing link-state packet?

- A. the complete sequence number PDU
- B. the partial sequence number PDU
- C. a hello PDU with a request PDU TLV specifying the missing LSP
- D. a hello PDU with a refresh PDU TLV requesting all LSPs

Correct Answer: B

---

### QUESTION 2

Once the initial route exchange has been completed, how frequently does BGP automatically sent route updates?

- A. every hour
- B. when the configured timer expires
- C. whenever a routing policy is updated
- D. as needed

Correct Answer: D

Once the initial route exchange has been completed BGP automatically sends route updates as needed. BGP uses TCP to provide reliable communication, which ensures that BGP neighbors never miss an update. A system of keepalives also allows each BGP peer to ensure that its neighbors are still function properly. If a neighbor goes down, the BGP speaker deletes all routes learned from that peer and updates its other peers accordingly.

---

### QUESTION 3

Which statement about Rapid Spanning Tree Protocol (RSTP) is correct?

- A. If a device configured for RSTP receives STP BPDUs, it sends STP BPDUs.
- B. If a device configured for RSTP receives STP BPDUs, it forwards them as STP BPDUs.
- C. If a device configured for RSTP receives STP BPDUs, it continues to send RSTP BPDUs.
- D. If a device configured for RSTP receives STP BPDUs, it sends RSTP and STP BPDUs.

Correct Answer: B

Enhancements enable RSTP to achieve sub-second forwarding and network convergence. RSTP is backward-compatible with legacy STP. If legacy STP BPDU is detected on a link, then an RSTP-capable bridge will revert to legacy STP on that given port.

---

#### QUESTION 4

What are three circumstances under which a router sends link-state PDUs (LSPs)? (Choose three)

- A. LSPs are sent periodically every 9 seconds
- B. LSPs are sent when there is a network change
- C. LSPs are sent during adjacency formation
- D. LSPs are sent in response to CSNP messages
- E. LSPs are sent in response to PSNP messages

Correct Answer: BCE

Link-state PDUs are sent as a response to a link-state request with a PSNP and during the formation of an IS-IS neighbor relationship. They are also sent as a triggered event when network changes occur.

---

#### QUESTION 5

How are BGP routes grouped when being sent in an update message?

- A. by grouping aggregated address ranges together
- B. by using a complete set of matching attributes
- C. by the originating autonomous system
- D. by the originating router

Correct Answer: B
