QUESTION 1

Which of the following options are advantages of using Lotus OneUI for a portal theme?

- A. Keyboard accessibility with hover effects, also providing focus effects or equivalent facilitation.
- B. The code base is tested for stability, accessibility, and bidirectionality in multiple browsers.
- C. Every page is enforced to look the same regardless of content, disallowing different browsers to make the pages look different under any circumstance or user input.
- D. A and B are correct.

Correct Answer: D

QUESTION 2

Which of the following options is not a valid Java 5 annotation tag defined by the Java Portlet Specification?

- A. @ProcessEvent(qname=)
- B. @ServeResource(name=)
- C. @RenderMode(name=)
- D. @ProcessAction(name=)

Correct Answer: B

QUESTION 3

Aside from normal steps for deploying portlets to a page, what additional step, if any, is necessary to configure a portlet using the Struts MVC framework and a portlet using the JavaServer Faces framework to the same portal page?

- A. Server-side aggregation must be forced on a page
- B. Both portlets must comply with the JSR286 Portlet Specification
- C. No additional steps are required
- D. Framework JAR files must be added to WebSphere Application Server shared libraries

Correct Answer: C

QUESTION 4

Jim has created an application template using his local development environment and would like to promote this template to his team shared development environment. What steps will he use to accomplish this?

- A. Use the Site Management portlet in the source server to promote the template definition to the target server.
- B. Use XMLAccess on the source server to export the template definition file, then use XMLAccess on the target server to import the template definition file.
- C. Use the Application Template Library portlet on the source server to export the template definition file, then use the Application Template Library portlet on the target server to import the template definition file.
- D. Use the Portal Scripting Interface on the source server to export the template definition file, then use the Portal Scripting Interface on the target server to import the template definition file.

Correct Answer: C

QUESTION 5
