QUESTION 1

A native Magento EAV entity will use_____.

A. A single table with separate columns for each data type (for instance, decimal, text, varchar, etc.)

B. A single table with separate columns for all data types used by the entity

C. A separate table for each data type (for instance, decimal, text, varchar, etc.)

D. A separate table for each data type in addition to a flat data table with separate columns to store values for each data type used by the entity

Correct Answer: C

QUESTION 2

You want to define a list of quote object attributes that are copied to the order object when an order is placed.

Which one of the following statements is true?

A. You can define this list by modifying the list of elements found in the configuration with the xpath global/fieldsets/sales_convert_quote.

B. You can define this list by modifying the list of elements found in the configuration with the xpath global/sales/quote/item/product_attributes.

C. You can define this list by checking the checkbox on the attribute edit page in the admin.

D. You cannot modify the list of fields copied from quote to order because the process is hardcoded.

Correct Answer: A

QUESTION 3
