QUESTION 1

You want to override the lcolumn.phtml file. Which two of the following methods could you use? (Choose TWO.)

- A. Rename the file in base/default to enable overriding.
- B. Rename the root template configuration in the admin.
- C. Create a file with same file name in the same directory structure as your theme.
- D. Create a file exception in System -> Design, clear cache, and rebuild indexes.
- E. Create a file with different file name and different directory structure; then change the template with the setTemplate method.

Correct Answer: CE

QUESTION 2

A parent HTML element has the style position:relative". You need to position a child element within the parent so that the child's position originates from the parent element's box. Which style on the child will accomplish that?

- A. position:absolute
- B. position:fixed
- C. position:relative
- D. position:static

Correct Answer: A

QUESTION 3

Given the following HTML code, how are the divs "#column1", "#column2", and "#column3" displayed on the page?

```
<style>
    .container { width: 600px; }
    .col { border: 1px solid #000; float: left; width: 200px; }
</style>

<div class="container">
    <div id="column1" class="col"></div>
    <div id="column2" class="col"></div>
    <div id="column3" class="col"></div>
</div>
```

- A. The 3 divs are displayed side-by-side and their borders are adjacent to each other.
- B. The 3 divs are displayed side-by-side; however their borders overlap with each other.
- C. The divs "#column1" and "#column2" are displayed side-by-side. The div "#column3" appears below "#column1".
- D. The divs are displayed on top of one another.

Correct Answer: C

QUESTION 4

In an email template or a CMS block, which two of the following directives specify a store URL without requiring you to hardcode the base URL? (Choose TWO.)

- A. `{{store url="checkout/cart/index"}}`
- B. `{{store route="checkout/cart/index"}}`
- C. `{{store checkout/cart/index}}`
- D. `http://{{store url="checkout/cart/index"}}`
- E. `{{base url=""}}checkout/cart/index`
- F. `{{store direct_url="checkout/cart/index"}}`

Correct Answer: AF

QUESTION 5

You have created a custom theme called my_theme within the default package and want to override the native template file /page/lcolumn.phtml. You will need to place the file in the following structure:

- A. `app/design/frontend/base/my_theme/template/page/lcolumn.phtml`
- B. `app/design/frontend/my_theme/default/template/page/lcolumn.phtml`
- C. `app/design/frontend/default/my_theme/template/page/lcolumn.phtml`
- D. `skin/design/frontend/my_theme/template/page/lcolumn.phtml`
- E. `skin/design/frontend/base/my_theme/template/page/lcolumn.phtml`

Correct Answer: C
