QUESTION 1

You attach an invoice format to the project contract. Which item is controlled by the invoice format setting?

- A. invoice output destination
- B. invoice currency
- C. invoice summarization
- D. invoice orientation

Correct Answer: C

QUESTION 2

You set up three pay-when-paid (PWP) terms and assign them to the vendors for a project.

For the first PWP term, you set the account code for all vendors (All). For the second PWP term, you set the account code for an individual vendor (Table). For the third PWP term, you set the account code for a group of vendors (Group).

What is the order of precedence for assigning the PWP terms when you create a project purchase order?

- A. Table, All, Group
- B. All, Group, Table
- C. Table, Group, All
- D. All, Table, Group

Correct Answer: C

QUESTION 3

Which statement describes what happens during the elimination process for a fixed-price project?

- A. The work in process (WIP) on-account account postings and the WIP production and profit postings are reversed automatically.
- B. All existing lines are removed from the estimate.
- C. The fixed-price project is removed.
- D. The WIP on-account account postings and the WIP production and profit postings must be reversed manually.

Correct Answer: A

QUESTION 4

You assign resources to a project.

You need to define the scheduling requirements for the project.

Which three actions are scheduling requirements? (Each correct answer presents part of the solution. Choose three.)

- A. Setting up the calendar to use for the workers on the project
- B. Specifying the estimated hourly rate for the workers on the project
- C. Specifying the type of calendar for the project
- D. Setting the start date and end date of the project
- E. Specifying the estimated number of worker hours required to complete the project

Correct Answer: ACE

Explanation: Before you can use the resource scheduling feature and assign workers to projects, the following prerequisites must be met:

*

The Project III license code must be enabled.

*

Project parameters must be set up to define the minimum thresholds for how closely a worker's skills and availability should match the requirements for a project or activity. This must be done before the worker can be included in search results.

*

(A) A worker must be assigned a calendar so that the worker's weekly capacity in hours be specified.

To assign a calendar to a worker, use the following procedure.

1.

Click Human resources > Common > Workers > Workers.

2.

Select a worker, and then, on the Action Pane, in the Maintain group, click Edit.

3.

In the Workerform, click the Employment link, and then, in the Calendar field, select a calendar.

*

(E) Before scheduling can occur, the scheduling calendar and the total work effort (in hours) for the project or activity must be specified.

*

The worker's education, skills, certifications, project experience, and other attributes must be specified.

QUESTION 5

You set up a project validation feature. You need to ensure that a particular project is available for only selected workers. Which two types of validation should you configure? (Each correct answer presents part of the solution. Choose two.)

- A. worker validation project assignment
- B. worker/project validation group
- C. project validation worker assignment
- D. worker/category validation group

Correct Answer: BC
