QUESTION 1

Isaac, the systems developer, is in a situation where he could retrieve the same dataset through either a select statement or a query.

What should be the determining factor?

A. A select statement is preferable where large volumes of data are processed.

B. It does not matter which way he gets the data, as long as he gets the right data.

C. If he can use a query, he should, as queries work faster than selects.

D. If he needs user interaction regarding the data he needs processed, a query is the preferable way.

Correct Answer: D

QUESTION 2

Where can you check Best Practice errors/warnings after compiling code?

A. Within the AXBP Log file.

B. It will automatically be shown in a separate pop-up window.

C. On the Best Practices tab page in the Compiler output window.

D. Best Practice errors/warnings will be highlighted in the code editor.

Correct Answer: C

QUESTION 3

Which of the following are ways to add a new string control for a field on the CustTable datasource to a report design? Choose the three that apply.

A. Open the Visual Report Designer. Right-click in a section and select New > Field from CustTable. Drag a field onto the section from the list that is displayed.

B. Open the Visual Report Designer. Right-click in a section and select New > String. Set Datasource property on new control to CustTable.

C. Drag the field from the CustTable node in the AOT to a report section

D. Right-click on a report section in the AOT. Select New Control > Field from CustTable. Drag a field onto the section from the list that is displayed.

Correct Answer: ABD

QUESTION 4

How should you change the label of an existing system field?

A. By modifying the existing label in the SYS label file.

B. By copying the object into a higher layer and then creating a new label in the SYP layer file.

C. By creating a new label in a new label file.

D. It cannot be done.

Correct Answer: C

QUESTION 5

Why is inheritance an important feature of X++?

A. Code can be written once and re-used many times

B. You can control whether code runs on the client or the server

C. Performance is improved when using an inherited class

D. Compile time is reduced

Correct Answer: A
