QUESTION 1

When can you use an expression as an argument when calling a function?

- A. When you pass the expression either by value or by reference.
- B. When the function call is used as a term in an expression.
- C. Only when you pass the expression by reference.
- D. Only when you pass the expression by value.

Correct Answer: D

QUESTION 2

Both Microsoft Dynamics NAV Server and the SQL Server Option for Microsoft Dynamics NAV implement optimistic concurrency in form-based updates. This means that if two users attempt to update the same table at the same time:

- A. The first user to go into the edit form for that table will lock the other user out of that form. The second user will have to wait for the first user to leave the form before he or she can continue.
- B. Both users can go into the edit form for that table and edit records, but if they both try to edit the same record at the same time, the first user to edit the record will lock the second user out of that record until he or she finishes editing it.
- C. Both users can go into the edit form for that table and even edit the same record. However, the first user to finish editing will be able to save the changes, while the second user will get an error saying that someone else changed the record.
- D. Both users can go into the edit form for that table and even edit the same record. The system will automatically compare the changes that the two users made and attempt to make both sets of changes. If both users changed the same field, they will both get an error.

Correct Answer: C

QUESTION 3

Which of the following is TRUE regarding receiving events in C/SIDE from automation servers?

- A. C/SIDE can receive events from components with the AutomationEvents property of the variable is set to Yes.
- B. C/SIDE cannot receive events from outside components.
- C. C/SIDE can only receive events from COM+ components.
- D. C/SIDE can receive events from components with the WithEvents property of the variable is set to Yes.

Correct Answer: D

QUESTION 4

The main limitation of dataports as a tool to integrate Microsoft Dynamics NAV with an outside application is that it requires the outside application to:

- A. Initiate all data transfers from itself to Microsoft Dynamics NAV by running the dataport.
- B. Be certified as Microsoft Dynamics NAV Compliant.
- C. Place its data into an ASCII file before the Microsoft Dynamics NAV dataport can read it.
- D. Know the internal data structure of the Microsoft Dynamics NAV tables to be updated by the dataport.

Correct Answer: C

QUESTION 5

A Command Button is a form control that can be used for many purposes, including the launching of another form or program. What Command Button control property can be used to make the system immediately perform the action you specify?

- A. RunCommand
- B. UpdateOnAction
- C. OnPush
- D. PushAction

Correct Answer: D
