QUESTION 1

You are the consultant for a Microsoft Dynamics NAV 2009 implementation. Your client has set up the following routing: Step No. Description 10 Wheel Assembly 20 Chain Assembly 30 Final Assembly 40 Control A portion of a production BOM set up by your client is as follows: Item No. Description 1100 Front Wheel 1200 Back Wheel 1300 Chain Assembly 1650 Pedals

Forward flushing is selected on the Item cards for all of the components. Your client wants to forward flush the chain assembly and pedals when the chain assembly routing step begins.

What setup must be completed to forward flush the components?

A. Select the Forward Flush check box on the line for the chain assembly step on the routing. In the Consume at Routing Step field on the pedal and chain assembly lines of the production BOM, enter the chain assembly step number from the routing.

B. In the Consume at Routing Step field on the pedal and chain assembly lines of the production BOM, enter the chain assembly step number from the routing.

C. In the Linked Item table for the chain assembly step on the routing, add the pedal and chain assembly items from the production BOM.

D. Assign the same routing link code to the chain assembly step on the routing and the pedal and chain assembly components on the production BOM.

Correct Answer: D

QUESTION 2
