QUESTION 1

As a result of an LDAP Server issue, a number of login attempts to CandDS failed. Once the LDAP issue is resolved, which of the following processes could an Administrator use to determine who may have attempted to login so they can be made aware that the environment is working again?

- A. Tools => Active Users
- B. Query the CandDS audit tables
- C. Server Administration => Security Reports
- D. File => Reports => Login Attempts

Correct Answer: B

QUESTION 2

What steps would a user take to determine the port that was specified when a Content Server Connection within Deployment Manager was created?

- A. Review the Port setting within Server Properties under Tools menu.
- B. Review the Port setting by right clicking on the Content Server Connection and selecting the Server Definition option.
- C. Review the Port setting within the Server Connection entry by viewing the properties of the Content Server Connection and expanding the Server Properties.
- D. Review the Port setting within Server Definition under Tools menu.

Correct Answer: C

QUESTION 3

A user wants to link the running of a CandDS job to a successful DB2 database update. Which type of job schedule allows interaction with 3rd party applications?
